FACEBOOK ADS 101

10 PART SERIES - WATCH OVER SHOULDER - VALUE \$197

Discover What You Need to Do To Setup Facebook Ads that Get Results

High quality video content is based on real proven practical methods and not theory. You have a higher chance of succeeding which results in more purchases.

Training shows you how to setup Facebook Ads even if you've never done it before.

Get access to this video training course immediately, even if we are sleeping.

10 videos - Total length 75 minutes approx

It's a fact that - Facebook Ads can be very profitable for your business.

But it's also a way to lose a lot of money if you don't do it right.

What I mean is...

There's a lot of courses out there on ads but they assume you know how to target the right person. They simply go over the technical aspects which anyone can learn.

The reality is if you don't know everything about your target audience, then you will lose money.

Think about it for just a second.

Waving a sign that says "Lose weight" to a male who wants to gain body mass doesn't make any sense does it?

Of course not... and the truth is most people do this.

So how do you find data that says – this is what your audience wants and how you should approach them?

How to make sure your ads appeal to the right person?

How do you use the right text, the right image, the right everything?

...and then how do you use that data to setup FB ads correctly?

Introducing...

Facebook Ad Basics

10 Part Video Course (65 minutes length approx. in total)

Here's a list of this 10-part video series in more detail:

Video #1 - Introduction to FB Ads

Have you ever wondered why your Facebook ads don't convert? The reason why is that most people jump with two feet and start creating ads. In this video, we will discuss the course itself and what you need to get started.

Video #2 - Paid Traffic Mindset

Before you create your Facebook ads, let's discuss why you need a mindset shift and what that looks like. This is the sole reason why some people succeed and paid traffic, while others fail. Jumping into Facebook ads without knowing this is a sure way to fail.

Video #3 - Who Are You Targeting?

Doing this one wrong will give you horrible results. In other words, knowing who you are targeting and how to target them is very important. This is the first step to your road to doing Facebook Ads the right way.

Video #4 - FB Insights

After you get a better grasp of WHO you are targeting, it's time to back that up with actual data. Fortunately – you can use a free, but powerful tool to get this data. This is very important especially before running any type of Facebook ad.

Video #5 - Creating an Avatar Profile

Now that you have gathered the right data from Videos 3, 4, and 5 – it's time to create your customer's avatar profile. This is simply a document that tells you what your ideal customer should look like and everything about them that you would need to find out.

Video #6 - Important Ad Rules

You should never setup ads until you've understood what Facebook does not like and what they want. Creating ads that violate policy is a sure way to get your account banned. So going over the rules is crucial.

Video #7 - The Pixel

Before you run ads, you need to make sure you have your pixel created and installed. We'll go over this, so you get the proper tracking setup.

Video #8 - Ad Campaigns

Now it's time to setup your Facebook Ad campaign. The campaign is what holds your ad sets and your ads and understanding your objective is crucial. In this video – you will get to see us setup an ad campaign in step by step manner.

Video #9 - Ad Sets

Now it's time to setup your Facebook Ad Set. The ad set is the child of an Ad campaign and it is what holds your ads. In this video – you will get to see us setup an ad set step by step.

Video #10 - Ads

Now it's time to setup your Facebook Ads. You will need to have your creative ad in hand to do this. The ad is the child of an Ad set. In this video – you will get to see us setup an ad in step by step manner.

How to Speed Up Your WordPress Sites Video Course

9 Videos - Total 50 minutes aprox.

Announcing the Brand New, 9-Part, Step-By-Step Video Course...

"Finally, Discover How to Speed Up Your WordPress Sites So That Your Visitors Can Get a Better User Experience Which Will Give You Higher Search Engine Rankings... Starting Today!"

These methods have been working for the last decade. There's no theory here!

If you've ever wondered why your visitors keep leaving your WordPress site and why you're not ranking in the search engine... it's most likely due to a few factors.

One of the many factors include how fast your website loads.

If you think about it, as information becomes easier and easier to access within seconds, the human patience has decreased.

When the internet was first released and people were using dial-up modems to connect online, many were just happy to get access to data from the world wide web.

But as the internet speeds got faster, the demand for data increased and people's patience became shorter.

As people's patience becomes shorter, so too does their patience for your site load speed.

It just makes sense when you look at it that way.

While we could discuss 100's of variables, it's best to start with one that everyone faces – which is website load speed.

Your goal at the end of the day is to keep your visitors on your site longer. This also helps your Google and other search engine rankings as well.

So, if you think of it from that standpoint and you adjust the user experience to be the best it can be, you will actually win the Google search engine game.

And that is how you kill two birds with one stone, or in other words win in both areas.

Of course, we could talk theory all day long, but the way you'll succeed is by understanding how to implement this in practical terms.

Here's a list of this 9-part video series in more detail.

Video #1: Introduction and Getting Started

If you've ever wondered what could be holding you back from implementing what you've learned, it's often because of your mindset. So, in this video we're going to talk about how to get into the right mindset. You're also going to get a quick overview of what's inside of the video course so you know exactly what to expect. Plus, you'll be given a list of things you'll need to get started.

Video #2: Advantages of Fast Site Speed

In this video, we'll discuss the advantages or the "why" you need to speed up your WordPress site. There are two major factors at play here, but fortunately you can accomplish both purely by focusing on one. The reality is that most people make the

mistake of focusing on the latter and then end up confused and frustrated. However, we'll show you the shortcut you need.

Video #3: Reasons Why Your Site Is Slow

To understand how to speed up your site, you first need to understand what is slowing it down. While there are hundreds of variables, we've narrowed it down to the most common variables that you need to focus on. So, you'll be given an idea of what they are and a brief description of how to pinpoint them.

Video #4: Too Much in Your Site

When it comes to building your WordPress site, it's so easy to get distracted with all the features that you end up loading your site with just too many files. In practical terms, you'll need to do a clean sweep of your site and we'll discuss what you need to do.

Video #5: Is Your Web Hosting Slowing You Down?

The next big variable is your web hosting. Did you know that most web hosting setups are not made for WordPress? Imagine going to a general practitioner for your heart, when in reality you should be going to a cardiologist if that makes sense. The reality is that most people are going to a general practitioner in this metaphorical sense.

Video #6: Image Optimization

One of the big factors of a slow website is how many images you have and how big your images are. So, while the simple solution is to compress your images as much as possible, that is not ideal, especially if you're busy. In fact, decades ago, you had to do this manually with Photoshop, but today you can speed up the process.

Video #7: Parasite Protection

In the digital world, you have other people who are linking to your images, videos, or other big files. What ends up happening is that you spend money on more web hosting resources. More importantly, we'll show you how to protect your site from digital parasites and what steps you need to take.

Video #8: WordPress Caching

As discussed earlier, the way caching works is your internet browser makes a copy of the items on the page such as images, text, and other media elements. The purpose of this is so the next time you visit the website, your browser will load the site at a much faster rate. Now you can do the same thing with your WordPress site, so that your returning visitors can experience the same thing.

Video #9: Content Delivery Networks

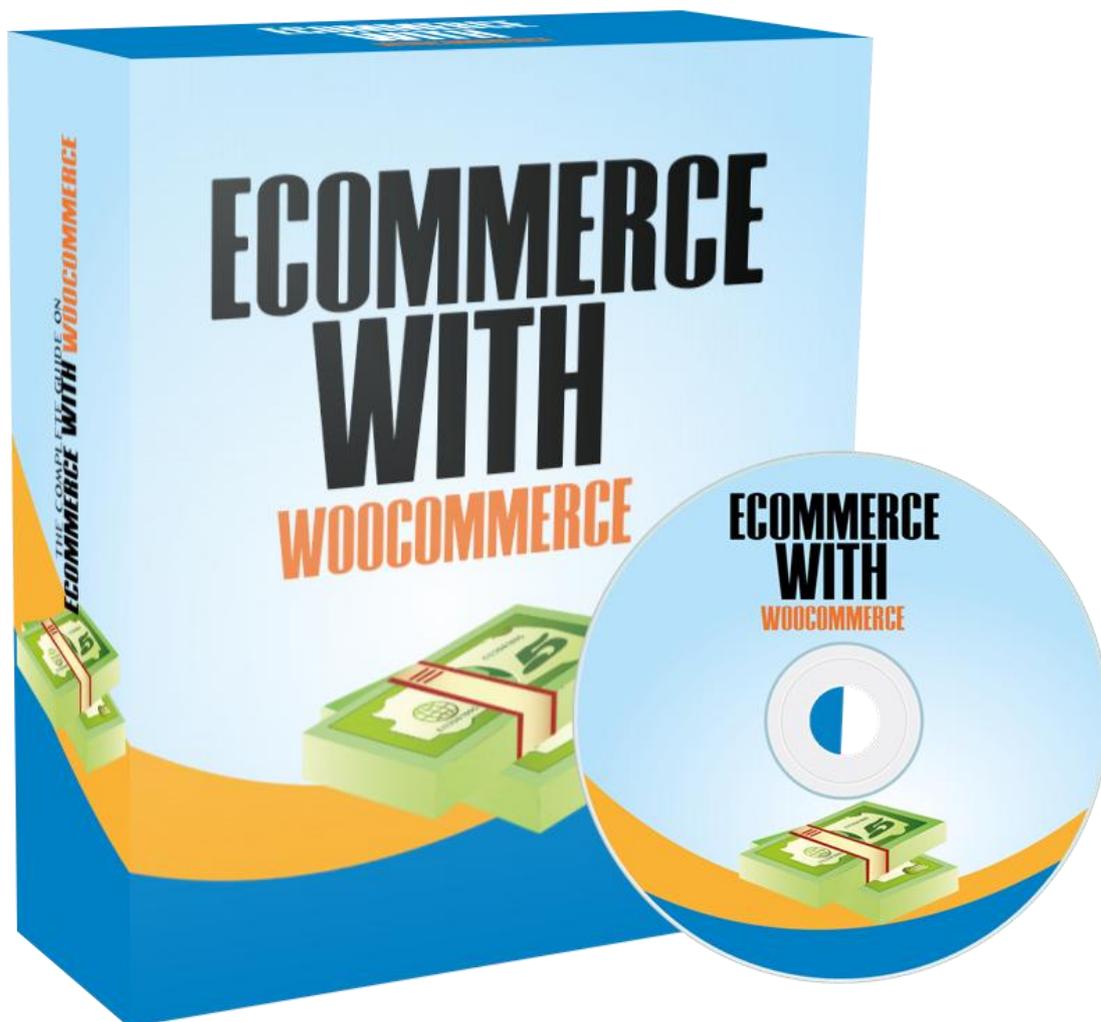

In most cases when running a website, you'll want to have a CDN, especially if you're trying to reach the world. You'll learn what CDNs we have tested and why we recommend that you use them.

Grab this video course and speed up your WordPress sites.

P.S. Watch this video course immediately after payment - there's absolutely no waiting!

P.P.S. Unless you take drastic action right now, nothing is going to change. Don't wait any longer!

Ecommerce With WooCommerce Video Course

8 Videos - 60 minutes length aprox.

Announcing The Brand New, 8 Part, Step By Step Video Course That Shows You...

“Finally Discover How to Create Your eCommerce Store With WooCommerce So You Can Start Generating Leads, Sales, & Profits!”

In this step-by-step video course, you will get to watch over my shoulder as I show you how to set up an e-commerce site with WooCommerce.

Whether you're selling digital products or physical products, creating an e-commerce store is your first step.

While there are a variety of different platforms that you can use to set up your e-commerce site, WooCommerce is the number one option if you are utilizing WordPress.

If you've wanted to sell your products online for a long time, but you just haven't been able to do so because of the technical learning curve, then this is your solution.

By the end of this video course, you'll have the necessary knowledge to set up your e-commerce site from scratch on the WordPress platform.

Condition: For this to work, you will need to have a website with WordPress installed on it. From this point, what did you how to do everything that you need to do to set things up the right way.

Video #1: Intro

Before we jump right in and show you how to set up your e-commerce site by using Woocommerce, we want to give you a quick overview of what's inside this video course. This way, you can get a Birdseye view of exactly what is inside this course. You will also learn how to install the main core plug-in.

Video #2: Themes

Before you get started, you want to make sure that your e-commerce site looks good. The reality is most of us are not graphic designers, and if we were to create an e-commerce shop design, it would most likely look ugly. So how do you get around this roadblock? The secret is to find seems that have already been created for e-commerce sites that either fit your target market or it is close enough that you can customize it a little bit further. You'll learn which sites we recommend you going to find the e-commerce design that you're looking for.

Video #3: General Settings Overview

Now that you have a good idea of where to get your e-commerce website design, it's time to look under the hood and go over the General settings of the WooCommerce plug-in. Well, there are a lot of settings, we will go over every single one of them step-by-step.

Video #4: Product Settings Overview

Now that we have gone over the General settings, it's time to look at the product settings, which will allow you to add specific products to your e-commerce site. This also includes other options, such as creating coupons.

Video #5: Product Organization

The harsh reality is when you begin to add many products; your system will become disorganized and confusing as to what is what. To help you combat this, we will teach you essential product organization or another word on how to organize all of your products so that you know precisely what is what and where it is located.

Video #6: Product Attributes

What if you're selling skateboards as an example? And you have all different colors such as red, green, blue, brown and more. You get the point. This is what we call attributes. They are simply variations or customizations of the same product.

Video #7: Expansion

Once you have your site set up and the basics complete, it's time to expand. What we mean by this is how do you grow your options, perhaps, maybe you want to create your monthly subscription, or a membership site, or something that is beyond the core plug-in.

Video #8: WooCommerce Automation

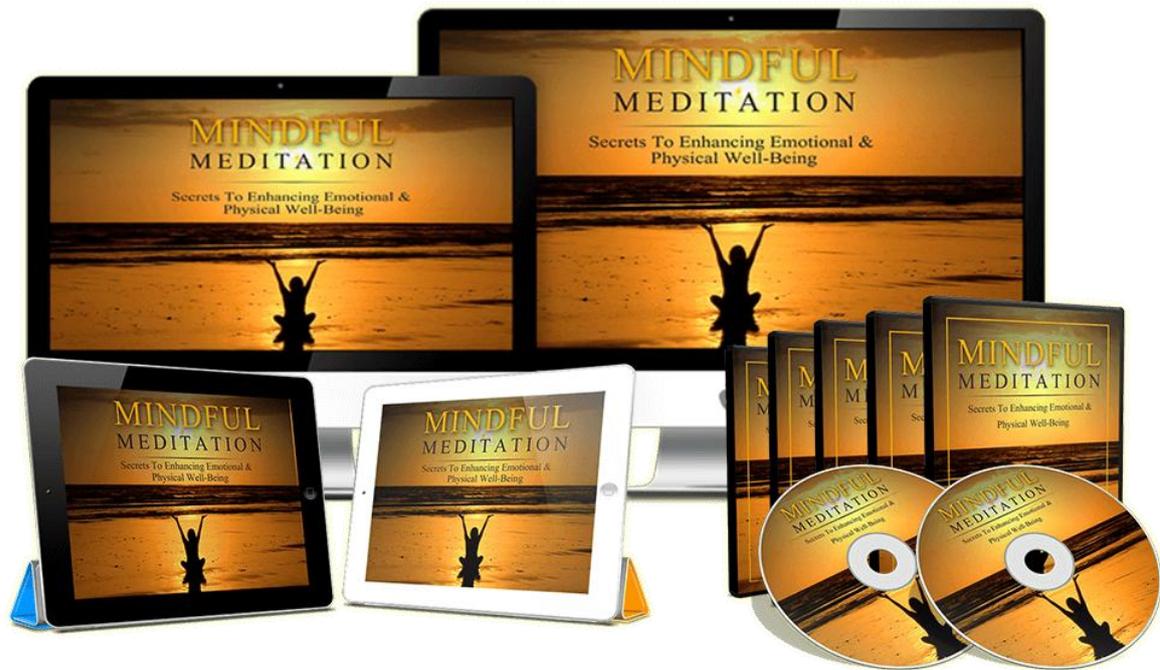

Now it's time to make your life a lot easier by automating the core plug-in. Let's say, for example, that every time someone purchases in your e-commerce store, you want to do something specific such as adding them to an email list, or a Google spreadsheet, or emailing them something specific. Regardless of what it is in this video, we are going to teach you how to automate it using a few third party services.

Grab this video course and learn how to set up an e-commerce site with WooCommerce!

P.S. In this step-by-step video course, you will get to watch over my shoulder as I show you how to set up an e-commerce site with WooCommerce!

P.P.S. You can download this 8 part, step by step video course within seconds of your purchase. It is delivered electronically, so there's no waiting!

There's a saying, "If you truly want to change your life you must first change your mind."

We've all come across friends or family members who are always ruminating about past wrongs. Or perhaps, we could be one of them...

We're constantly seeking for solution to enhance our ability to deal with everyday struggles.

Our ruminating brain keeps our mind spinning about the past. Our minds are constantly agonizing over missed opportunities replaying failures.

Want to learn how to break the pattern of dwelling on past mistakes?

Find Out Here

Today, we are all suffering from information overload and stress more than previous generations.

Meditators practice meditation to reduce stress and enjoy greater peace...

With Mindful Meditation, you can learn to create a moment of joy, a feeling of happiness, at any time of the day.

Get Instant Access To Mindful Meditation

According to research, mindful meditation has been shown to bring various positive benefits.

It's been shown to reduce stress and anxiety, improves immune function, and reduces inflammation.

Not just that, many successful people are crediting meditation as part of their regime to grow values, character and improve their overall health.

When we practice mindful meditation consistently, we gain an inner calm that will help us deal with life's many challenges...

No, you don't have to be a yogi to reap the benefits of mindful meditation. Remember... You have the power to change your life for the better.

Mindful Meditation will bring a huge difference to your life

It all starts here.

Isn't it amazing to live a healthy, happy life?

Don't you want to be productive all day?

Don't you want to concentrate your awareness on the here and now?

Don't you want to reduce stress and have control over your own emotions?

With mindful meditation, we can become more relaxed and are able to let joy and peace into our lives...

Our mind can be conditioned in many ways.

With the help of mindful meditation, we can recognize a pattern of behavior.

It's this awareness that allows us to take that first proactive step toward change.

I can show you the secrets to a happier and healthier life once and for all.

But you need to take the first step.

Mindful Meditation will show you where to begin but it is ultimately your own effort to break your habits and behavioural patterns for a happier and healthier you.

Did you know that...With the help of meditation practices..

- Eighty percent of hypertensive patients have lowered blood pressure and decreased medications - 16% are able to discontinue all of their medications. These results lasted at least three years.
- One-hundred percent of insomnia patients reported improved sleep and 91% either eliminated or reduced sleeping medication use.
- Infertile women have a 42% conception rate, a 38% take-home baby rate, and decreased levels of depression, anxiety, and anger.
- High school students exposed to a relaxation response-based curriculum had significantly increased their self-esteem.

This system has helped me figure everything out how to transform my mind from negative to positive, from disturbed to peaceful and from unhappy to happy...

When we practice mindful meditation and examine new positive thoughts and feelings, it serves as a roadmap to different choices and opportunities...

Discover Ancient And Proven Methods To Triple Your Productivity, Vitality & Finally Experience True Joy
I'll Personally Show You Ways You Can Use Meditation To Dissolve Any Barriers To A Better Life

Did you know that you and I will have between 50,000 to 70,000 thoughts today?

98% of these thoughts are the same as yesterday.

70% of them will be negative thinking.

Which means, most of us live our day to day talking down to ourselves!

We abuse ourselves with negative thoughts that not only limit our growth in life but also damage our body.

When I found out about this fact, I decided to turn my mind from an enemy into a friend.

I promised myself that I would never let my mind put down my ambitions, goals, and dreams.

Instead, my mind will be the supportive friend that guides me towards those desires.

That's when I started to improve my relationship with myself and discovered mindful meditation.

WHAT SCIENTISTS HAVE FOUND ABOUT MEDITATION

According to research, mindful meditation has been shown to bring positive effects to both the body and mind.

Obviously, it reduces stress and anxiety.

What's remarkable is that it also improves immune function and reduces inflammation, which means you are less prone to disease and pain.

Scientists also found that it increased the gray-matter density in the part of your brain associated with compassion and learning.

8 weeks of meditation was enough to make the patients more focused and more loving.

Isn't it wonderful how the simple act of meditation can transform you into a productive person who everyone likes being around?

Within us is the power to become ten times better than what we are now and yet everyone is asleep!

WHY ARE MOST MEDITATORS, INFLUENTIAL PEOPLE?

Take a look at the people who have caused great changes in the world.

Oprah Winfrey, Rupert Murdoch, Larry Brilliant and Ray Dalio all said meditation helped them achieve success.

Ancient civilizations like the Greeks and the Hindus spawned many great thinkers and their culture had detailed meditation systems.

Looking further back, most founders of religion meditated and their influence can still be felt today.

I'm sure you'd agree that meditation opens us to a different way to approaching the world.

Imagine how much difference you'd make in this world after meditating.

You'd be more creative and focused in whatever you do.

You'd stand out of your own way towards success.

You'd find people gravitating to you.

You'd feel true joy from within.

How to Build a Successful Buyers List (Video Course)

9 Videos - aprox. 90 minutes length

Foolproof Technique Shows You How To Get Hungry Buyers On Your List By Leveraging Others!

This video course will take you behind the scenes to help you understand how to build a higher converting buyers list by leveraging other people's lists.

You've been told repeatedly that the money is the list. That is true. However, far too many business owners struggle with this concept. Have you been struggling to build a list that converts into sales? Or maybe you've tried and couldn't even build a list? Either way - you can do it if you're willing to take the time to follow this blueprint. I must warn you though - while it can send you a flood of highly targeted buyer quality traffic, it does take some work. But if you're the 1% of action takers then this is for you. You'll learn a specific strategy that is often untapped because people don't want to take action.

Introducing "Building Your Buyers List"

Video #1: Introduction and Quick Overview In this video, you will be given a quick introduction and overview of the video course itself so you know exactly what to expect.

Video #2: Different Types of Customer Lists Before we discuss how to build a high-converting list, it's crucial to be able to discuss the different types of lists that you can build so you understand and are able to differentiate between them as you build your campaigns. As such, this video will give you an eye-opening experience of why we will focus heavily on one list type.

Video #3: Highest Converting List and How This Works Ever wondered why certain lists convert better than others? Well, in this video we will talk about the blueprint of the highest converting list and how all of this works so you get a bird's-eye view.

Video #4: Formula for High Value TY Offers In this video, you will learn how to create high-value offers that will make vendors get extremely excited about what you are offering to their buyers' list. We'll also discuss things that you should avoid doing.

Video #5: Finding Vendors to Piggyback On Obviously, to build a high-quality buyers list, you must find vendors in your niche willing to do so, right? While there is a large amount of them, how do you find the ones interested in what you're offering vs. the ones that aren't?

Video #6: Vendor and Buyer Analysis Once you find a niche, it's time to analyze your vendor and buyers to ensure that your thank you offers are as high of a quality that they will demand, so much so that they are even willing to pay for it.

Video #7: Creating Quality TY Offers Once you've done the proper research in the previous video, it's time to create your offers by putting everything that we have talked about into action.

Video #8: Building List #1: Vendors

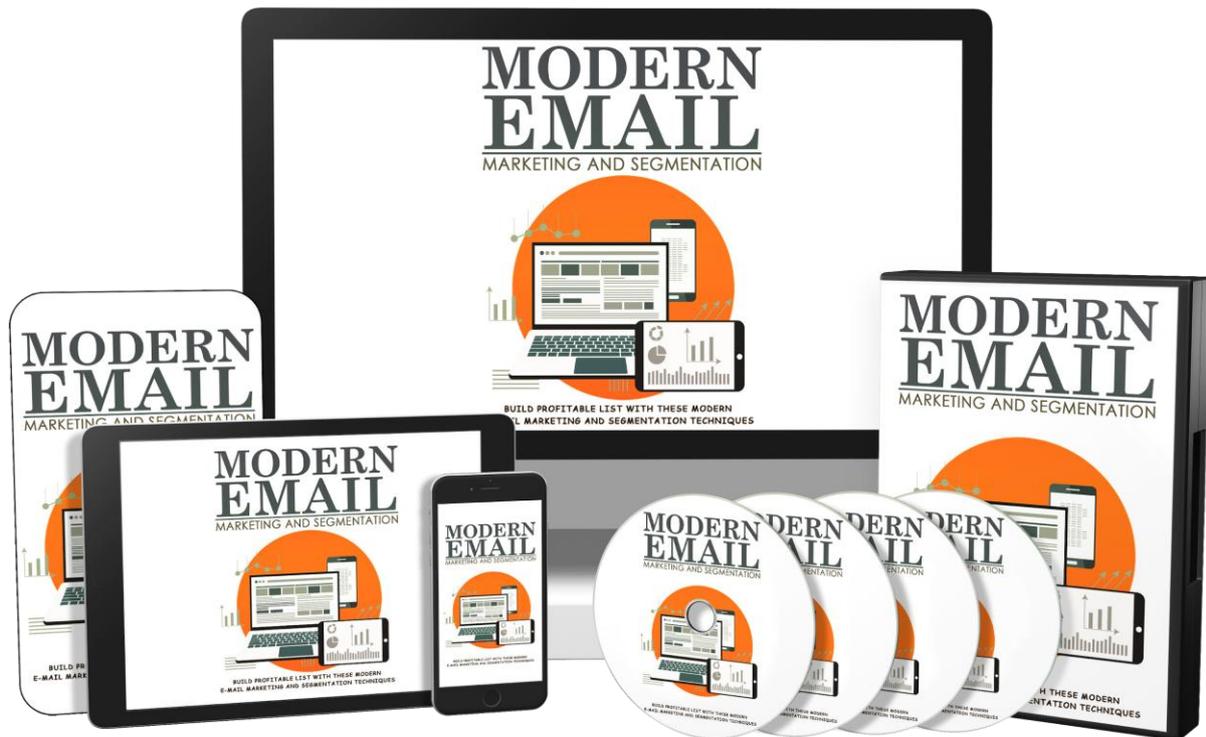

In this video, we will discuss how to approach these vendors with your specialized offers. We will also discuss what you must do and what you must avoid that can cost you the deal.

Video #9: Building List #2: Affiliates Keep in mind that it does take time to negotiate with vendors, so while you are doing that I'm going to show you another way to build your buyers list and utilize the strategy, without re-creating your offers and still building a profitable list virally.

P.S. Watch this video course after payment.

P.P.S. Does your business look like a ghost town? Unless you take drastic action right now, nothing is going to change. Don't wait any longer!

This has been working for the last decade. There's no theory here!

Whether you are trying to rank for a specific term in Google or other search engines, most businesses forget one crucial thing, which is on-page search engine optimization.

That technical term simply means that you help the search engines know what your site is all about.

The reality is that most businesses forget this crucial piece of the puzzle and simply don't know why they're not getting traffic from Google.

They think SEO is a big scam purely because of bad assumptions.

So, the big question is: how do you achieve this?

How do you appear on the right keywords that your prospects and potential customers are searching for?

Google and other search engines have become much smarter than ever. What this means is that they are constantly trying to figure out what your website is all about.

That said – it still needs a little help to know what your website is all about and that is the best way to get ranked on the right keywords, so that you attract the right prospects.

Most people forgo on-page search engine optimization, and try to focus on getting backlinks.

This is a big mistake, because by not doing something as simple as on-page SEO, you will lose out on some great initial rankings.

Who is this PLR Video Course Perfect For?

Internet Marketing Coaches

Book Marketers

Affiliate Marketers

Digital Product Resellers

Email Marketers

Membership Site Owners

Marketers looking for Editable Video Guides and Tutorials with Private Label Rights

Newbie marketers looking to learn from it

Online businesses looking to grow

Serious Marketers

And many other ways!

The fact is that people love learning from videos and video training in highly in-demand because people prefer learning from videos.

Here's a list of this 9 part video series in more detail.

Video #1 – Introduction to On-Page SEO

If you've ever wondered what could be holding you back from implementing basic on-page search engine optimization, it's often because of your mindset. So, in this video we're going to talk about how to get into the right mindset. You're also going to get a quick overview of what's inside of the video course so you know exactly what to expect. Plus, you'll be given a list of things you'll need to get started.

Video #2 – The Main Focus

On-page SEO is such a broad term that covers a lot of areas of your website, both on the front end and the back end. There are so many different approaches and angles to take that it's quite easy to get confused and we don't want that. Therefore, the purpose of this video is to get you focused and help you understand what the plan is.

Video #3 – 5 Important Factors

Before we jump into the 5 major factors that all your WordPress sites (or even non-WordPress sites) should have, it's important to have a general bird's-eye view of what they are.

Video #4 – URL Structure

This is something that has changed slightly in the last decade, but not drastically. The question that everyone asks these days is what domain name should you use? Should it be a brand name or should it be a keyword-rich domain? There's more on that in this video.

Video #5 – Body Text Structure

Should you make your blog post and page human friendly or search engine friendly? If both, how do you achieve that? What are search engines looking for? What are the things that you should avoid doing? What elements should you always have on your post or pages?

Video #6 – Image Optimization

When it comes to images, how does the search engine know what the images are all about? Are they smart enough to figure this out? Or do you need to add some special code to achieve this?

Video #7 – Title Optimization

This is extremely important because it's often the first thing people will see as they are searching the internet – before they even get to your site. This needs to be set for all of your posts and pages. But how do you properly set the title of your post or page?

Video #8 – Meta Optimization

Just like the title optimization video beforehand, this is also what people will see as they search the internet. It's the description beneath the title and you'll also need to set this up on

both your posts and pages. How do you properly set the meta-data and how long should it be?

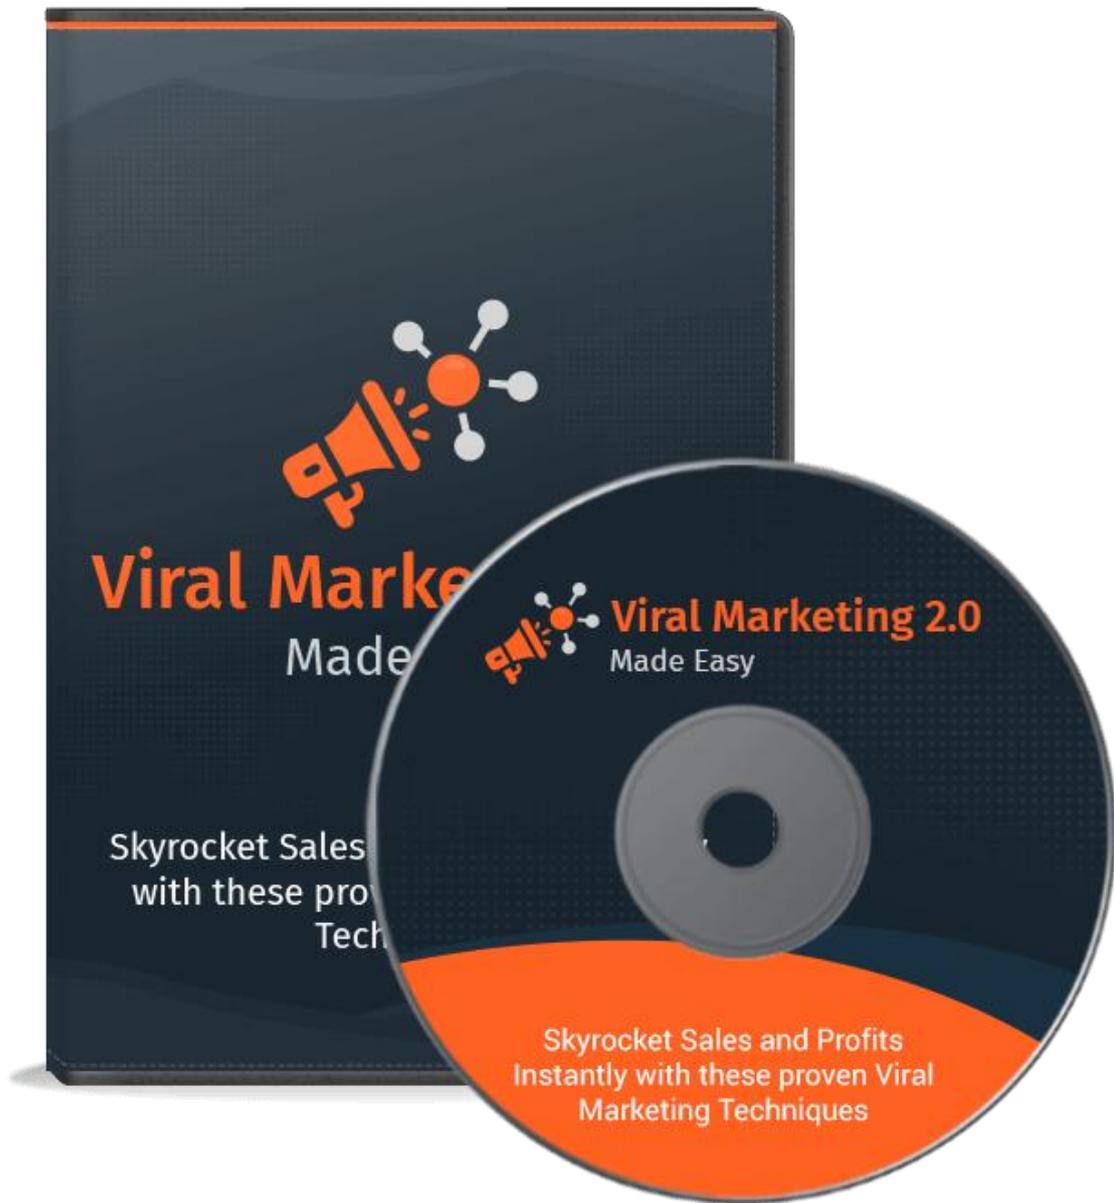

Video #9 – Top 2 WordPress Plugins

Now that you understand how to implement these 5 factors, I'm going to show you how to automate them. There are two WordPress plugins that we highly recommend you install, which both have free and premium paid levels. Do you really need the paid levels, and how can they help you rank your sites even better?

Grab this video course and start making your WordPress site SEO friendly. Follow this simple step-by-step system and start setting up your very own digital membership site!

Amazon Affiliate Essentials Video Course

Video Course 20 minutes length

Not many people know this, but you can actually make money online using Amazon.

Amazon have set up an affiliate program (they call it the “Amazon Associates Program”). The theory behind the Amazon Associates program is amazingly simple. By sending traffic to the Amazon website, you will earn a commission (between 5%-10%) on all of the sales that result from any visitors that you send.

This is great because it means you do not have to get involved in product fulfillment. You have no stock to store, you don't have to pick and ship orders and, perhaps most importantly of all, you don't need to get involved in any customer service activities. All you have to do is be purely a marketing machine and send traffic to Amazon's site.

Of course, the real trick – in fact the key to making this all work - is to send traffic to the Amazon site at a cost that is less than the revenue you receive from Amazon. If you are able to do that, then you can definitely make a tidy profit in the process.

Now, there are a number of options open to you for creating traffic. You can create traffic for free by writing articles, creating your own blog or even by setting up a website of your own and going through the lengthy process of optimizing your website for the search engines so that your website is listed near the top of the search results. These three methods are time consuming, but they will get you results if you stick with them.

Another way of generating traffic, which unfortunately is not free, is to create advertising campaigns using one of the many pay-per-click options that exist. This basically means using Google Adwords or the similar services offered by Yahoo! and MSN.

If you hadn't already noticed, every time you do a search in Google, you will see a series of paid advertisements down the right-hand-side. You can create adverts that will be displayed when the user types in specific search terms.

So you can pick specific products from the Amazon website to promote and set up a specific pay-per-click campaign for each of these products. Each time the user clicks on one of your adverts, Google will charge you for the click, hence the term pay-per-click. You, in turn, point the user to Amazon's website. If this whole process costs you less than the commission you receive, then you make a profit.

Simple as that!

Well, not quite. But help is at hand. If you are interested in learning how it is possible to make good money as an Amazon Affiliate, here you will get the full information.

If you want to earn money online, as well as providing a useful service for any visitors to your site, becoming an Amazon associate is one of the better methods.

As one of the largest online retailers anywhere in the world, Amazon offers pretty much anything that you could want to buy, from books to laptops, and much more.

Chances are, that no matter what subject your website or blog is about, you are not able to provide every single possible piece of information on the subject yourself.

Chances are further, that if you are passionate about giving your users the best service possible, you have thought about providing them with links to further reading, or an outlet where they can buy books or products relevant to your page.

If you become an Amazon associate, you can leverage the content of your website to send traffic to Amazon's website, and get paid a nice commission every time one of your users makes a purchase from Amazon. You can choose from a number of formats for the links on your page to make them fit in with the rest of the design, and whether you provide a link through to a page within Amazon where users can buy a particular book to complement the information you are providing.

The great thing about the Amazon associate program is that at the same time as you are helping your users to get easier access to the information that they want, through a link directly through to its source, you are also being paid for your time and effort in creating the content in the first place. You can either choose to receive your payment in cash directly into your bank account, or alternatively, in the form of vouchers that you can spend on Amazon itself.

Although there are plenty of other similar affiliate programs available online, there are none which allow you to provide relevant links on such a wide range of subjects or to such a wide range of different products as the Amazon associate program does, and this, thanks to the ease with it can be implemented on your pages makes it the perfect choice for any user who wants to gain an important source of revenue from their online efforts.

And lately you do not even have to maintain your own website in order to make money from Amazon. A new multi-search engine called Radiux allows users to plug in their Amazon Associate code and make money on purchases that are initiated by that search engine.

So, you see: there is no excuse not to become an Amazon Associate and start making money online now.

Many people have taken the plunge and joined the world of affiliate marketing.

Affiliate marketing allows you to work for yourself and put your skills, hard work and independence together for you. Success in any business will not happen over night.

It still takes time and effort to get your affiliate marketing scheme up and running. However, if you are persistent, determined and willing to give it your all, affiliate marketing can be the perfect career opportunity for you.

To become the so called super affiliate, you should really follow the advice of other successful affiliates.

They have been through what you are and know what they are talking about. One of the first pieces of advice they give is to concentrate on a niche.

Don't try to sell everything but the kitchen sink. Concentrate on one thing in the early days. Work out the best way to sell it and get going. Once you have some strategies worked out you can always expand.

Once you have built up a store house of affiliates, you need to know how to promote.

Search engine and the web is usually the best way. If you are confident then you could try pay per click.

However, make sure you understand this well. Many affiliates have gone for this option only to find that their profits have been eaten up.

You should take time to know your product and who you're aiming it for. When you understand both well you begin to build up credibility. People will begin to trust you and what you offer.

They will feel much better about giving their business over to you rather than others. This will result in higher sales revenue for you and a much stronger business.

Don't be afraid to diversify. Sign up with more than one merchant. Beware of any merchant that wants you to sign up with them exclusively. By using several merchants you get much more exposure. You are also protecting your self if one merchant goes under or does not pay.

Keep on top of current trends in the market. Be prepared to change if you need to. The world of internet marketing is continually changing.

By staying flexible and having a willingness to change you can make these changes work for you rather than against you. Remember, what was working last month may not be this month.

Finally, don't give up. It is true that many of these affiliate marketing schemes do fail. However, the reason isn't due to poor products or ideas. It is because people give up way too soon. It takes time to build any business. Just keep at it. Try to do something everyday to promote your business. If you keep it up you will eventually start to see results.

Affiliate marketing is a great way to make money and work for yourself. You can put your skills and creative knowledge to work for you and not others. Affiliate marketing does take work. You need to build it up like any other business.

However, if you stick to the advice in this article and don't give up, you'll soon find that your business is booming.

Affiliate marketing is a great career opportunity. With hard work and determination you will be well on your way to becoming the super affiliate.

Reverse Aging Video Course

8 Videos - Total Length 65 minutes

When it comes to aging, age is just a number.

Have you ever noticed that some people age slower than others, almost like those who tend to 'reverse age'?

I'm sure you know of Jennifer Lopez.

She is 47 years old but still looks 20. She attributes her youthful look to the basics: exercise, good sleep, meditation, water, and moisturizer.

Liu Yelin is another 50-year-old "hot" mom, often mistaken for his son's girlfriend.

So how exactly do people stop rapidly approaching age in its tracks?

Want to know the secret to freeze your aging process?

Whether cosmetic or emblematic of a deeper health issue, signs of premature aging of the skin, hair, brain or body may add decades to our chronological age.

However, as far as aging goes, most of us tend to be concerned with only half the equation; the superficial half.

But guess what...

Aging isn't only about looking good on the outside. If anything, it's about feeling great on the inside

How your skin ages will depend on a variety of factors: your lifestyle, diet, heredity, and other personal habits.

Want to hold on to your youthful looks?

All juicy information on how to turn back your biological clock...

Seriously, don't take my word for it... you simply have to check it out yourself!

Thank Me Later!

"Beware the barrenness of a busy life." ~Socrates

Did you know that the busier we become, the more stress we are under, the greater the toll on the body?

We all want to look young, vibrant and energetic but we're not doing it the right way.

Sometimes we get so caught up in life... We have no time for leisure activities, for family or even for a walk in the park...

But did you know that your daily lifestyle plays a huge role in the reverse aging process?

Reclaiming your youth does not have to be an impossible task.

It can be as simple as changing the things we do to ourselves because the damage that we bring on ourselves is the easiest to correct.

There are a number of ways that you can optimize your health and prolong your life...

Want to discover simple ways to naturally reclaim your youthful looks, energy, strength, and libido without resorting to extreme measures?

Find Out How To Transform Your Life Here

Did you know that the way you appear to others is an obvious indicator of how successful you may have been in halting the aging process?

So what is crucial to keep you young and healthy on the outside as well as on the inside?

We're so afraid to look into the mirror to see fine lines and wrinkles way before time, greying and thinning hair as well as weak and brittle nails...

We're constantly seeking for ways to stay young and have ourselves looking and feeling fabulous...

Today is your lucky day...

'Reverse Aging' will reveal the secrets sauce to keep you YOUNG.

What are you waiting for?

Discover How To Freeze Your Aging Process Here

No, you don't need to spend lump sum on getting the best skin care cream to look young...

You don't need to sacrifice your sleep to spend long hours working out....

All you need to do is to take better care of yourself through diet and other lifestyle practices.

It really is that simple!

Dont believe me?

Check It Out For Yourself

At the cellular level, something called mitochondria creates the energy needed for our cells to keep life going.

Over the course of the aging process, they become less efficient, and eventually break down entirely, leaving our bodies with less and less ability to regenerate.

However, scientists have found that this decline in mitochondria's efficiency can be slowed down or even reversed by adopting a few lifestyle habits.

Want to know the lifestyle habits that keep you looking young, healthy and vibrant?

Find Out Here

Don't you wish to improve your overall health?

Don't you want to reduce or prevent grey hair and wrinkles?

Don't you want to wake up every day full of energy, vitality and vibrancy?

If you answered YES... Then you have to start taking massive action...

Remember you have the power to change your life for the better.

Reverse Aging will make a huge difference to your life!

It All Starts Here.

You can easily slow down your aging process by follow natural anti-aging strategies...

You don't have to go through expensive cosmetic surgeries, creams, or treatments to age reversely.

You might be thinking... how is that possible?

Well, nothing is impossible! When you take massive action to work your way to freeze your aging process, you'll get the results you want. You just have to do it the right way.

Want to know if you're doing the right way?

Email Marketing Basics Video Training

10 Videos - Total length 85 minutes

This video course will take you behind the scenes to help you understand how to build a relationship with your list. You've already heard this over and over again.

Announcing a Brand-New 10-Part Video Course

Discover How to Set Up Your Email Autoresponder with GetResponse So That You Can Grow an Email List That Gets Clicks and Converts into Sales... Starting Today!

This video course will take you behind the scenes to help you understand how to build a relationship with your list...

You've already heard this over and over again.

The money is in the list. Or you're able to print money while you sleep.

These are true to an extent and only if you are able to master the process of attracting prospects, building relationships with them online, and getting them to take action in the form of buying your product or service.

The reality is that most business owners like you don't have the luxury of making instant connections with people.

Relationship building takes time and must be done delicately and consistently.

You can't simply assume someone will buy the first time they sign up on your list. Oftentimes it will take 7-12 emails before they even see the value you are offering.

That said, you can easily do this online via Email Marketing autoresponders if done properly.

In other words, regardless of when someone signs up on your list, you can talk to them based on when they did so.

The problem is most people know this is what they need to do, but don't know how all the pieces of the puzzle fit together.

You will gain access to in-depth videos on Email Marketing that not only show you how to plan out your email series, but also how to take the series and set them up on

You don't have to use GetResponse, it's just easier to show you on the platform and if you can master this - you can apply it to other platforms.

Here's a breakdown of this 10-part video series in more detail.

Video #1 - Introduction

Before we dive in, it's very important to be in the right mindset. Time and time again we have seen people jump in and try to build a list that converts and fail. This is because they were not in the right mindset nor did they do the proper planning, so I want to do it differently here and make sure that you do not take their path to failure. As such, we will be giving you a quick overview of the video course itself so you know exactly what to expect. We will also talk about what you need to have in hand before you get started.

Video #2 - What's Your End Goal?

Before we jump into the technical parts of how to set up your email autoresponder, it's very important to understand your end goal. What are you trying to sell? What are you trying to achieve? What do you want people to feel like?

Video #3 - Creating a Connection

Before you write out your email autoresponder, you really need to understand the problems people face and what the solutions are. Essentially, what keeps them up at night? While you may have heard this over and over again, this is extremely important. You need to jot these solutions down so that people feel connected to you.

Video #4 - Backward Email Funnel

Now it's time to start mapping out your email series.

To speed things up, you are going to learn how to set up a backward email funnel based on what you wrote down in Video #3.

Video #5 - Quick Overview of GetResponse

Before you jump into using GetResponse, you need to understand what is important on their dashboard and get a feeling of how to navigate around.

Video #6 - Creating a List

Creating a list is the first step. Should you do double opt in, or should you stick with single opt in? What are the advantages or disadvantages? What does a list mean? How do you create one? We'll explain the details surrounding this feature and why it's important to you.

Video #7 - Set Up Your Autoresponder

Once you create a list, you need to set up an autoresponder. Understanding how an autoresponder works is more important than understanding the technical parts. When do you email someone? Should you email them every day or every other day? What works better?

Video #8 - Setting Up Your Emails

Now that you understand how autoresponders work, it's time to set up your emails and connect them to your list. We'll make sure you understand everything from start to finish.

Video #9 - Setting Up Web Forms

Now that you have set up your autoresponder, it's time to set up a web form. Nowadays, you usually don't need to do this if you're using a landing page creator like Leadpages, but I'll cover it just in case you need it.

Video #10 - List Hygiene

Cleaning your lists is important, because believe it or not, email ISPs like Gmail, AOL and Yahoo do care if you have a list filled with people who are active or not. This can impact your delivery rates. So, in this video, I'm going to show you some advanced strategies that are surprisingly rarely discussed, so you can start off on the right foot.

P.S. Have you tried profiting from an email list and had no success? Unless you take action right now, nothing is going to change. Don't wait any longer!

How To Use Webinars For Your Business

12 Videos - Total length 98 minutes

Webinars are one of the few online marketing methods that allow you to have REAL TIME COMMUNICATION with your audience, build credibility and authority and ultimately drive more sales in profits in your business.

Why do you think that more than 65% of BIG companies worldwide run at least one Webinar per month?

Right now Webinars are probably THE highest CONVERTING tool online for driving sales. Videos, Emails, Articles still work very well but it's very unlikely to bring high ticket sales of up to 5000\$ like Webinars do.

The fun fact is that people all around the world are using the power of arbitrage and the internet to build time freedom and the lifestyle that they desire.

So, if you are not using Webinars yet in your business you are leaving a lot of money on the table. But hey, that's why we are here, to help you start using Webinars for your business.

Learn To Get Your Clickbank Product Approved Fast Video Course

10 videos - Total length 62 minutes

You've decided that you want to take the plunge and setup your own product on the worlds biggest marketplace for digital product sellers.

Everyone knows how important Clickbank is when it comes to selling digital products on the Internet and everyone has purchased a product through Clickbank at some point in their time online.

The problems arise when you actually want to setup your product so that you can launch and start seeing those sales come in.

Do you actually know how to setup your Clickbank product so it gets approved fast?

Have you seen the inside of a Clickbank merchant account and navigated around the administration settings?

Do you have any clue how to set your product up so that Clickbank accepts it and you can start accepting payments?

Most New Marketers have no clue what it takes to setup and use clickbank to sell Their products online!

When it comes to setting up your product on Clickbank, you may not know the ropes of getting your product setup and accepted.

In fact, the majority of people with Clickbank accounts never get their product setup and approved because they just don't know what to do!

Sure, Clickbank is the biggest 3rd party merchant provider on the Internet but that doesn't mean that the system is easy to understand.

Many people pay a small fortune to programmers or outsourcers to setup their product on Clickbank. This probably isn't what you want to do.

As you can probably imagine, the last thing you want to encounter when you're ready to sell your product is a huge roadblock preventing you from doing so!

In this videos, you are going to learn how to completely destroy any of these roadblocks so that you can take the easy path to Clickbank success AND profits!

UPDATE! - The Credit Card Standards Have Just Changed Affecting Clickbank, You, AND Your product!

While the complication that we've talked about previously is certainly something to think about, the biggest thing that you need to be concerned with has nothing to do with technical problems!

The credit card industry just made major changes to the type of products and billing that are allowed by merchants and third party merchants alike.

This means that you have to be REAL careful how you sell your product or you could end up getting banned!

Clickbank already had a hard approval process for each product prior to these changes but now their approval process has become more strict!

Many Clickbank merchants have had their products removed and their accounts banned all together!

Do You Know What It Takes

To Actually Get "ClickBank Approved?"

Now that you know that there have been major changes to the credit card industry as a whole and that you have yet an additional roadblock there, what are you going to do?

Do you know what it takes to get approved to process live sales on Clickbank?

I've personally been witness to people who have submitted their product to Clickbank after going through the process of setting it up only to be denied. Worse yet, I've seen people be denied multiple times!

Some people get denied and they ditch Clickbank. That's a huge mistake!

You need to know how to follow the rules while still setting your product up for maximum success. No red flags!

Following the rules can be difficult because there is a lot of fine print, unspoken assumptions, and hoops to jump through when working with Clickbank.

You have to remember that your product is reviewed by a human. Humans get irritated, bored, lazy, etc on any given day which could result in your product being denied!

This is why it's vital that you do all of the RIGHT things with your product setup to ensure speedy acceptance.

"Okay, Great! There's complication, hoops to jump through and new credit card guidelines. Am I Really going to be aBLE to get approved?"

I know that some of the things that I've talked about may seem like they are there to pull you down, everyone thinks that at first.

Sure, there are some hoops to jump through as well as working with getting approved and setup but it doesn't have to be so complicated!

While many people are overwhelmed, there are a ton of people who HAVE done it and have done it quickly, easily, and without knowing a bunch of technical stuff.

Over the years, I've personally setup tons of products on Clickbank while getting easily approved and doing so quickly.

In fact, it's become so easy for me that I can setup a Clickbank product in a matter of minutes and submit it without any question that it is going to be approved the first time, every time.

If you know all of the ins and outs of doing everything just how Clickbank wants, there's no reason that you too can't be approved without hassle or having to redo things over and over again as well.

Why is it so important to use clickbank when selling a product online?

is it really the best merchant provider and will it make a difference on my overall sales numbers?

Many people wonder if setting up with Clickbank is the best choice for their business. Let me assure you, YES!

Clickbank has an extremely big digital marketplace. There are literally tens of thousands of products that are for sale at any given time.

There are two huge benefits to using Clickbank...

- 1) The digital marketplace is so big that it draws in tons of shoppers that are looking for products to buy and download. This means that once your product is in the marketplace, you will start getting some of that free traffic and some of those free sales!

2) You gain more esteem in the marketplace by being listed with Clickbank because of the sheer size and authority of the site. People trust Clickbank and are comfortable searching and shopping there.

These benefits help you generate traffic, sales, and additional exposure for your product without having to do any advertising at all.

There are nearly ZERO third party merchant providers that are so big when it comes to shopping traffic which means that none of them offer substantial exposure for you!

Clickbank is in a league of their own here!

The Biggest Benefit Of Using Clickbank - Affiliates!

If you thought the benefits of getting exposure to your product as previously mentioned was a big deal, you were right!

However, there is a much , much bigger benefit that comes from using Clickbank - Affiliates!

That's right! Clickbank also has a built in affiliate program in their merchant software and they have HUNDREDS OF THOUSANDS of affiliates!

That means that when you setup your product and get it approved, you automatically have access to all of those affiliates who can promote your product for you, bringing in more sales!

The best part is that you don't have to do a thing to manage the affiliate program because Clickbank has all of this built right into your administration area and the Clickbank software itself.

They track all of the payments, they give your affiliates links to promote, and they even split the payments up and send your affiliates their checks each month.

Talk about a completely automated affiliate program!

"You Need To Know How The pro's Do It.."

By now, you know that there are a few hurdles to be overcome when it comes to setting up your product on Clickbank and getting it approved.

You are also aware that those hoops are small in comparison to the huge benefits you get via additional exposure and affiliates in the Clickbank Marketplace!

So how are you going to get setup?

I am going to show you how I've personally setup a product by starting from the very beginning of setup, to getting approved and making money on Clickbank!

I've done this many times and I'm going to share that with you via an simple, step by step system that you can easily stick with.

Simple Account Setup!

...and I believe that you too, can achieve the same positive results!

Your path to greatness starts here.

Introducing
Wired For Greatness
How To Start Living A Legendary Life

"Wired For Greatness" is the ultimate guide that shows you how to re-wire your brain for greatness. You'll soon discover that greatness can be cultivated by anyone with the right strategies. With this guide made available, now you can take the first step to live your own legacy!

Greatness is not necessarily about becoming extremely wealthy, red-carpet famous, or creating world-changing impacts. Greatness is about achieving excellence in important areas of your life. Your career, personal relationships, or business.

If you don't want to settle for mediocrity and wish to upgrade your life to the next level... this blueprint will help you answer your own personal calling of greatness.

Here are the things you will discover in this transformational program:

What is a legendary life and how you can start living one.

How to spot where the problems are in your life and how to design a plan for change.

How to improve your physical health.

How to improve your mental health.

How to recognize negativity in your life and how to take steps to avoid it.

How to change your attitude for the better.

How to identify your own talents and recognize how you can use them to benefit yourself and others.

How you can change your mindset to embrace positivity.

How to recognize the things that matter most in your life.

How to be true to yourself so you can exploit your full potential in all aspects of your life.

And much more waiting to be uncovered inside!

This is the Golden Key for those who want to:

Live life on their own terms

Achieve excellence in all areas of their life

Upgrade their life to the next level

Go from ordinary to extraordinary

Develop unstoppable confidence

Rewire your brain and settle for nothing less than greatness

You are just one click away to transforming your life.

You Only Have 3 Options Right Now:

Option A

Do Nothing

If you choose to do nothing, your life will remain the same as where you are right now. There is nothing exciting to share with your family & friends. There is nothing to look forward to other than leading a 'boring' ordinary life.

But remember, you will be jealous when you see other people rise to greatness just because they took action. You knew that it could be you, but you didn't do anything about it.

Option B

Look for other solutions

Obviously, there are other solutions out there that can help you achieve greatness. But I've already saved all the trouble especially if you want to do your own research on this topic.

I don't want you to waste your time looking for other programs and then get disappointed.

Plus, all you're getting from this life-changing blueprint are proven strategies that I personally use to unlock my true potential and achieve all the success I have.

I want you to get better.

Option C

Get Wired For Greatness.

I have explained how Wired For Greatness can help you unlock your truest potential, achieve extraordinary things in your life, and become the best in your field. This attitude will help you achieve all the goals you set in life. More importantly, you will lead a happy, satisfying, and fulfilling life.

Plus, if by 30 days you don't like what you get from the Wired For Greatness, you can ask for 100% of your money back.

You have everything to gain and nothing to lose by this offer.

How to Build a Facebook Messenger Chatbot to Generate Leads 9 Part Video Course

9 videos - Total length 78 minutes

Announcing The Brand New, 9 Part, Step By Step Video Course That Shows You...

“How to Build a Facebook Messenger Chatbot to Generate Leads... Starting Today”

Messenger can become one of your most important marketing channels, and you'll learn how in this step-by-step video course.

You're probably here because you're interested in learning how to use Facebook Messenger to generate leads or semi-automate your customer support.

According to Facebook - On average, there are over 7 billion conversations taking place on Messenger every single day.

Messenger is growing bigger than Snapchat, Instagram, and Twitter combined, every day, so there's a lot of opportunity for your business.

Many businesses are building Facebook Messenger chatbots to generate leads and semi-automate customer support.

But the big roadblock that a lot of people face is trying to figure out how to do this.

It takes a big technical learning curve to create them unless you're a tech savvy person.

So, if you want to be able to create chatbots without learning how to code - look no further because we're going to be talking about that in this video course.

9 Part Video Course

Here's a breakdown of this 9 part video series in more detail.

Video #1: Introduction and Getting Started

Messenger is way bigger than Snapchat, Instagram, and Twitter combined. It's easy to get excited and want to jump in without much planning, but don't. To make sure you start off right - well, give yourself a bird's eye view first.

Video #2: Different Uses

Before we jump into the course, it'll help you to know what you can create in terms of a chatbot. There are 100s if not 1000s of ways, but our goal is to help you pinpoint a general idea of what you want to accomplish.?

Video #3: Major Chatbot Mistakes

It's best to start on the right foot, so in this video – we're going to go over some common mistakes that can potentially lower your conversion rate. A lot of these are simple and sound like common sense, but are common mistakes you want to avoid.

Video #4: Bot Breakdown

Now that you understand some common mistakes and what you need to do to get a good head start, let's take a look at some bots and break them down a little.

Video #5: Increase Conversions

Whether your bot is focused on customer support or converting prospects into leads – this quick and easy method will help you.

Video #6: Brainstorm

As noted earlier, having a mockup of your bot's layout is crucial before you jump in and create one. But before you can create a mockup, you need to do a little bit of brainstorming.

Video #7: Organize Your Ideas

Now that you know how to implement the “brainstorm platter method,” it’s time to dig deeper. Let’s organize your questions and answers...

Video #8: Mockups

It’s almost time to create your bit. Now, let’s work on creating the final mockup first so you can do it successfully.

Video #9: Implementation

Congrats! You’ve reached the end of this course. It’s time to take what you’ve brainstormed and turn it into a chatbot. Let’s jump right in....

Grab this video course and learn how to use Facebook Messenger to engage with your prospects and customers.

Ace List Building Complete Course

You will receive written material, audio & video versions

Discover how to set up the Ace List Building system just one time to grow your list, build your brand, and generate repeat sales on autopilot. After that, just add traffic!

The 'Missing Ingredient' all marketers forgot to tell you when they say "The Money's In The List."

If you, like most people, get this part wrong you'll be married to a JOB and doomed work hard every time to make a sale. This 'Missing Ingredient' goes beyond building a relationship with your subscribers because it also grows your business quicker, faster, and easier!

How would you like to start banking in predictable income and generate windfall profits at a minor expense of working just a few hours a day - and do it for a long, long time to come? Of course you would. Who wouldn't want to?

If you have been immersed in the Internet Marketing space for at least a few months, surely you have seen some fads come and go.

Make money from Facebooking is not something I would call a 'solid business model' - not when the social network keeps changing every now and then because Mark Zuckerberg and his team feels like it.

The Search Engine Optimization game will never be the same for too long. Take a look at the history of Google Slap, Google Panda, Google Penguin (and whatever is going to come next...)

The Adwords and Pay-Per-Click game is not like what they used to be. As soon as some keywords start yielding high value you will pay more per click and eventually your conversions and back-end funnels won't be enough to cover even your up front cost!

Even the affiliate marketing game changes. Old redundant promotion techniques like whipping up a one-page review site get shortlived when everyone else picks up the same method and do it too!

You may have witnessed some of these trend changes. And they all have one direction in common: DOWN.

If you have to keep learning and relearning new techniques to ride on every trend, making money online is going to be a struggle. And how LONG can you last?

The Short Answer To The Long Problem: Go Get Your Own Mailing List.

It's tried. It's tested. It stands the test of time.

You won't be at the mercy of shortlived trends because email is an essential Internet tool - and everyone with an Internet access has an email account.

Once you get people onto your mailing list, it's yours. They have already given you their permission to email them, and you can be making money just sending emails to them.

How long does it take to write an email? No more than five minutes of your time.

How often can you send emails to them? As often as you want! (I prefer to send once a day but it's up to everyone's preference)

How much money can you make? Well, the more email subscribers you have, the more potential income you can make - literally with the click of the mouse!

If You Don't Already Have A Mailing List, You Don't Have A Business.

By 'mailing list' I don't mean just a list of names and email addresses. If no one on your list is a willing buyer, you can't start lining your pockets.

While most Level 1 amateurs don't have a list (and resort to animal instincts to make money online), I suspect the Level 2 marketers already have their own autoresponder and may have some subscribers already.

Except that they are not making money yet.

You need a pool of hot, hungry buyers waiting to give you money every time you ask for it - not an ocean of tire-kickers.

"The Money Is In The List".

A list contains names and email addresses of people who:

- 1) Are likely to buy what sell, and
- 2) Have given you permission to sell to them.

Easy, right?

Now when you have a list, you can send offers to them to buy something. This is NOT spamming. You must build a relationship with your people and provide relevant messages to them in order to be successful.

Why build a list?

If you have been online for some time, you know that traffic is the currency of the Internet. Once you built your list, you never have to worry about getting traffic, EVER.

Here's why...

All I need to do is send an email to my list, invite them to click on a link to my website, and

Voila! Instant Traffic!

Matter of fact, if you play your cards right you can make money clicking the "Send" button in your email software and have orders pouring in -- within minutes! I have seen it happened before and also done it myself several times.

The way I see it right now, there are more products in the marketplace than there are marketers. Which makes marketers more valuable and in demand.

Even if you have no product of your own, with a substantial mailing list you will have product creators flocking to you instead of you having to go all out.

You can negotiate from a position of power, like

Strike up partnerships with amazing product creators who create groundbreaking solutions but don't have the reach.

Beating up other affiliates in sales contests (and win some extra cash, prizes and fame while you're at it)

And you can shamelessly ask for a higher commission percentage (no more 50-50!) and some extra favors.

Remember, they need you MORE than you need them now!

Over the years, I have applied every technique I know to build my list to build, support and grow my business. Some worked like gangbusters, while others were

just a waste of time and money. In the end, I distilled techniques that worked and kept using them to generate new customers to make sales to.

The best part is that all the time throughout, whenever a fad bursts it has little or no effect on my profits.

Because I don't build my business on shaky grounds. And I certainly don't waste my energy and efforts on anything I suspect is just a passing trend. As fad bubbles pop and the latest moolah-making technique is exposed for the fraud it is, I continue to chug cash into my PayPal account, ClickBank account...

You get the drift.

I Want To Invite You To Become The Next List Building Ace, And Here's How You Can Start Banking In Perpetual Income Using Foolproof Methods!

Ace List Building

6 Modules (Videos and Transcripts)
Total Running Time: 1 hour 18 minutes
Download After Purchase

My course is so-called because I give you a set of chronological instructions for you to follow and build your own responsive, high-profit mailing list. While I could be a little bit 'sneaky' and charge a premium on my time, the truth is I don't have the luxury of time to coach every single person.

So I decided the best way to go about doing this is record all my lessons into this course - and you can get it right away after you making your purchase.

There won't be any fluff and there certainly won't be any guesswork.

A Sneak Peak Inside My Course:

Module #1: Ace List Building - Overview

Module #2: Squeeze Page "Black Belt" Writing

Module #3: 3 Steps to Instant List Profit & Multiplication

Module #4: Repeat Sales with Email Automation

Module #5: Getting Traffic and List

Module #6: Putting Everything Together

I will be tutoring you via videos and with each Module, I also provide a transcript in case you prefer reading somewhat. (I recommend listening to the video while reading along where possible, to maximize your learning experience.

Above All, This Works.

Now I don't know you personally but based on my personal experience and many of the people I've talked to, I can make a few safe assumptions:

You are tired of running the mill, living hand to mouth from lacklustered money-making methods you've come across so far.

You are willing to make this work.

You are not in the habit of over-spending your money.

And you want it right now!

Because perpetually everything you need to know is available here within the running time of my course - distilled from over years of online marketing experience - for you to quickly generate returns!

Here's The Skinny:

Discover how to setup the Ace List Building system just one time to grow your list, build your brand, and generate repeat sales on autopilot. After that, just add traffic!

The 'Missing Ingredient' all marketers forgot to tell you when they say "The Money's In The List." If you, like most people, get this part wrong you'll be married to a JOB and doomed work hard every time to make a sale. This 'Missing Ingredient' goes beyond building a relationship with your subscribers because it also grows your business quicker, faster, and easier!

The entire Ace List Building scheme in full detail. Use this scheme to "download" the Ace List Building system into your brain in one glance! Never again get stuck trying to explain the Ace List Building process to your outsource team. Just hand them this scheme and say "I Want It Now!"

New Anatomy of the Squeeze Page unlike any other. You'll know EXACTLY what to put into your squeeze pages with this outline. Don't know how to write long copy? No problem. This strategy can give you high subscriptions rate even if your copywriting IQ is below zero.

Steal this secret sauce that keeps my business running at full speed even during the recession when my competitors run dry on cash and traffic. Plus, I will teach you to do this without spending any money on expensive scripts or software.

How to get repeat sales from the same customers who bought from you before. Once you engineer this process properly, your customers will want to buy more stuff from you again and again.

Get paid faster with 3 profit centers and 1 traffic multiplier built into the Ace List Building system The 4 cornerstones.

Squeeze Page "Black Belt" writing. How to write killer copy if all you have is a basic command of English. Use this sequel technique to multiply your subscription rates further. No longer do you have to be at the mercy of an expensive copywriter when you can do a better job yourself using "Black Belt" writing.

Origins of the Squeeze Page explained in plain English. Just in case you're new to all this, I will teach you the basics one step at a time. If you're advanced, then this is the best refresher you'll ever find.

Look Inside The Hood! The 4 essential components in the "new generation" Squeeze Page engine. Lose any one of the components and your squeeze page is at a severe disadvantage.

Use this proven Squeeze Page format to construct your own subscriber sucking' machine. Plus, new squeeze page discovery that converts XX% better than the norm. Learn how to reproduce this anomaly so you can turn the tides to your favor.

Headline Howitzer! How I construct my headline to pack the biggest bang for my buck. You'll discover the same blueprint to write your own attention grabbing headline, down to the exact font type, color, and message.

Introducing the 'Spokesperson Squeeze'. The essential element used in my "new generation" squeeze page to champion my list building. Since implementing this technique, my conversion rate improved by a factor of XX.

Apply the "Opt-in Machine" Sign-Up Strategy and your subscriptions will increase in droves. These secrets of direct marketing have been time-tested and used in online

squeeze pages. Remember the “cut-out coupon” found in newspapers? There’s a reason why it still works and I’ll show you how to use it.

Multiply your results through serious automation and the 3 steps to instant list profits.

Avoid the biggest mistake marketers make after someone presses the “Submit” button. Instead, do the opposite to instantly weed out disinterested prospects from the very beginning.

How to build your list exponentially by enlisting the help of every new subscriber that enters your list. And the best part is, all this is done completely free of charge! This is truly list-building on steroids.

Recession-proof your list building activities. I will teach you how to powerfully position your list-building so you never have an excuse to “lay-off” building a list. Plus, I teach you how to use this technique to make money from cold prospects affected by the recession.

Making word-of-mouth work in your favor so other people build your list (and you don’t even have to lift a finger).

The magic bullet I use to increase the life span of my products. And... how I successfully sold the same information and digital goods to my list over and over again.

Hate to hard-sell your subscribers? Then this strategy of selling is for you. In fact, it’s even better than getting JV partners to make sales for you.

Get more people to click on your order links. See how I increase my click through rate (CTR) without working hard – even a 12 year-old can do this.

Important Insight Inside: “When you start selling something, something strange happens...” Learn how by adding one word to your email, you can make your customers want your products so badly that they search for excuses to buy. Hint: And when you give them the reasons to buy, the sale is done!

How to weed away whiners and become wealthier with every email sent.

Discover the types of offers which work best on follow-up emails. Plus, a neat email writing trick used to generate \$20 million dollars in annual revenue and how you can do it too.

Pull out my never-before-revealed case study of follow-up emails sequence. Again, I will hold your hand and walk you through the entire process and in the end, you’ll be

ready to craft sales-pulling emails. Be prepared though, your fingers will literally *dance* on the keyboard.

Final Question: “What Happens After My Subscriber Received All My Emails But Never Bought?” I will teach you what I do to save unresponsive customers and re-activate them. Plus, you’ll know how long I wait before sending the next offer.

How to pour a never-ending supply of traffic into your list-building funnel.

A simple, step-by-step procedure to avoid broken links, 404 “Page Not Found” error, and other kinks and glitches in your system.

Get instant traffic in 5 minutes using this cost effective pay-per-click strategy. Also, uncover lucrative and highly targeted keywords with this marketer’s best kept secret software.

Start your own split-testing campaigns to multiply your opt-in rates without buying expensive software or hiring techies to do the work.

How to get tones of traffic by syndicating content. Plus, use this loop-hole in article directories to get your list built faster!

Long term traffic in 30 minutes. How to get cooperation from membership site owners to pour traffic to you willingly. Plus, a list of membership sites to get you started. With this strategy, you’re practically transferring paying customers from other people’s membership sites into your list.

Ethically trade your subscribers for even more subscribers in a single email. Use the Ad Swap technique to leverage on your current subscribers.

Flood your list by cooperating with other list-owners through “closed door” events. Learn how to do this properly and align with the right partners to get an advantage. Plus, common dangers to prevent your list from being sucked dry.

Alert! Ninja-level traffic tactic exposed. Here’s an uncommon and rare technique to get hot buyers into your list. I won’t even mention the name of tactic here because it works well beyond my expectations so I’m keeping this only for customers of Ace List Building.

AND MUCH MORE . . .

I want to be clear and up front on a few things:

This is NOT your average home 'study' course. There's nothing to "study" here.

This is NOT rehashed, regurgitated, repackaged information that no longer works.

This is NOT full of outdated, expensive or illegal list-building tactics.

This is NOT for lazy people who don't bother to follow instructions.

By now, you're probably asking how much this is going to cost.

But what if you were to ask yourself how much it would cost you IF you don't start your own Ace List Building Machine today.

Most people start by buying a domain name (around \$10 a year), paying for web hosting (around \$10 a month), then getting an autoresponder (around \$20 a month), and then they buy traffic (\$50 budget) and push leads into their "Squeeze Pages" for signups.

That's about under a hundred bucks.

If that's your game plan, stop right now.

Everything from the domain name up until the autoresponder part is correct. The problem starts at the traffic part!

If you don't have a proper game plan, you are not going to ace the Internet marketing game. (You know, I sometimes still wish I can go back a few years and tell myself what I know today!)

But I can tell you how. And you don't have to make the same mistakes I did when I started. Smart people learn from their mistakes; smarter people learn from other people's mistakes.

You probably have heard how marketing gurus are pricing their seminars and coaching programs on the same topic for an upwards of \$2000 and above.

While I could go along that line and build a consultation program around this method, as mentioned earlier I have no intention of doing that in interest of personal time.

And my educated guess says that not everyone has a spare \$500 laying around either.

So I'll give you instant online access to my Ace List Building course at a much lower price.

Now you have no excuse not to succeed.

But that's not all...

It Doesn't Have To Be 'Yes' or 'No' - A 'Maybe' Will Do. Test Drive It For 60 Days!

Here's the deal: You are instantly protected by my 100% satisfaction "or your money" guarantee policy, and that's a promise I make to all of my customers.

With the Ace List Building blueprint, you will experience adrenaline list-building rush like never before. And because I want to recession-proof your success, I'm giving you another a FULL 60 DAYS so you can carefully apply everything at your own pace. This is my special treat to you in case you still need to work 8 hours a day to make a living.

If you follow the step-by-step instructions I give you, not only can you make back your investment, but certainly have enough money to reinvest in your autoresponder, web hosting, and for better Squeeze Pages to multiply your earnings.

If you can't make back your investment, then I don't deserve your money and I insist you demand a refund.

What have you got to lose?

Ace List Building

P.S. You are protected by my full 90-days guarantee to test my system. Either own a highly responsive list of buyers - or your money back! This is your opportunity to quickly build your list and buff it up with hot, hungry buyers to storm through these tough economic times. Delaying will only cost you so take full advantage and invest in this system now.

YouTube Channel SEO Video Course

8 videos - Total length 36 minutes

Announcing The Brand New, 8 Part, Step By Step Video Course That Shows You How To...

“Rank Your YouTube Channel & Generate Traffic To Your Products, Affiliate Products, and More... Starting Today”

In this specific video training course, you will get to watch over my shoulder - step-by-step, click by click - and learn how to take your YouTube Channel to brand new heights.

Dear Future Video Marketers,

It's nothing new that YouTube is a huge source of traffic for your products or services.

Video marketing is one of the easiest ways to get highly targeted traffic, but you have to do it right. If you do it wrong and simply upload a video to YouTube in the hopes that it will get ranked both on YouTube and on Google... then you won't be as effective.

That may have worked back in 2005 where you could just throw a couple backlinks at it, but today is different.

The problem is that ranking on YouTube isn't as easy as it was back in 2005, or even 2010.

Plus, on top of that, there are tons and tons of different marketing strategies out there online. Many of these work and many of them have faded away.

So what works and what doesn't now?

What is a long-term strategy that will work for years to come?

It's simple.

Understanding what Google wants and making sure what you do looks as natural as possible is the key strategy here.

We can't say what it is other than that, but you can even outsource this process.

Once it is setup, you can let it run.

There's nothing spammy about this method either.

Here's a list of this 8-part video series in more detail:

Rank Your YouTube Channel Higher

Video #1 - Introduction to YouTube Video Traffic

Before we jump right in, we want to make sure that you are in the right mindset. So, we will be discussing where you need to put your 100% focus into. In addition to that, we will discuss a quick overview of what's inside this video course, so you know exactly what to expect. You'll also get to see everything that you need to get started successfully.

Video #2 - What This Is NOT

To ensure you are able to successfully implement this strategy, we want to discuss with you what this is NOT about. The reality is that there's a lot of misconceptions that people have

when it comes to ranking videos on YouTube or even Google. These misconceptions or assumptions that certain things working certain ways don't work or will actually prevent you from succeeding. So, to make sure that these don't create roadblocks for you, we want to make sure that you understand what this is not.

Video #3 - What Google Wants & The Strategy

In this video, we are going to discuss what Google wants based on the data that we have seen and how the strategy works. Part of being able to rank on YouTube and Google is to understand what Google wants. If you can understand their vision, then you can adapt a long-term strategy to your ranking strategy. By the end of this video, you should have a better and clearer understanding of what you need for your game plan.

Video #4 - The Ring

Now it's time to focus on the strategy in a very specific step-by-step plan of attack. This strategy is what we call "the ring". To make things easier for you, you will be given a visual map of what this looks like in practical terms.

Video #5 - How to Automate The Ring

After viewing the previous video, you can imagine how tedious and overwhelming it is to have to maintain the ring, much less get it setup yourself. Yes, getting good rankings is not an easy shortcut by any means. Lucky for you - there is a way to automate it once you have set things up.

Video #6 - Account Creation

In order to set up the ring, you need to be able to apply best practices in terms of creating accounts. Fortunately for you, we have been creating accounts which have been successful and have failed at the same time, so we are able to share with you what has worked for us. Believe it or not, if you don't follow these best practices - some of your accounts can potentially be removed or banned by these big platforms.

Video #7 - Outsourcing

As you can see, creating a ring is very time consuming. It can take a week or two for someone who's never done this before. So, finding somebody who has done this before and

has done very effectively is crucial if you want to focus on the other parts of your business. Lucky for you - we have used several and will show you who we get so you don't have to lose money finding the wrong person...

Video #8 - Testing

Whether you created the ring yourself or hired someone to do it, testing it is very important. In this video, we will show you how to test the ring to make sure that it actually works.

And don't worry about all the technical details if you're not tech-savvy. If you can simply watch a video, watch over my shoulder step-by-step and click by click, then you should have no problem at all setting up this system and start receiving traffic.

So, grab this video course today and begin generating targeted video traffic for your products the right way.

How to Generate Traffic With Pinterest (Video Course)

Discover How to Generate Traffic With Pinterest & Get More Clicks With This Simple and Easy to Follow System, Starting Today !

It's easier to convert traffic from Pinterest than other social media platforms and here's why...

It's a fact that Pinterest is huge and has tons of prospects waiting to find you.

According to Shopify - from their analysis of over 25,000 online stores - they found that the customer who initially comes to Pinterest, via Facebook or Twitter, will spend about twice as much as those who don't. These are just some of the countless amazing statistics from Pinterest. If you're a business, then you'll want to tap into this market.

According to new research, "Roughly 25% of consumers reported purchasing a product or service after discovering it on Pinterest."

Compared to most social media sites, Pinterest decreases the amount of steps users take from discovering something interesting to a conversion.

But here's the problem.

Most people are marketing on Pinterest **WRONG!**

In fact, you may have tried it and not gotten any results and thought, "This doesn't work."

However, you have to do it properly and provide what we call, "Pin Worthy" images.

You're competing against thousands of other images, so how do you survive?

What should you put in your images?

How should you lay out your funnel?

Is there a blueprint or a formula to this madness?

Pinterest Anatomy

9 Part Video Course

Here's a breakdown of this 9 part video series in more detail.

Video #1: Introduction

While everyone else is pinning their hearts out and wondering why it's not converting, you're going to be doing something else. In this video, we're going to make sure you have the right mindset, so you can successfully implement this strategy. The goal is to ensure you're not thinking like everyone else. You'll get an idea of what tools you'll need as well.

Video #2: The Platform

Before we get started, it's crucial that we're on the same page. You're excited about learning how to use Pinterest to get traffic, but to ensure your success is high – we want to make sure you're hitting the bullseye or at least close to it. Part of understanding how to get traffic from Pinterest and convert it, is understanding how it ticks. How it's different from others is crucial and is a much-overlooked part of the process.

Video #3: Quality Is Key

Once you understand how Pinterest works and what type of people go to it, we'll talk about the images that you add to these boards. It's obvious that you'll be competing with 1000's of other businesses or individuals, so your images and other visual content must be extremely high quality. But how do you go about creating these high-quality images? What if you don't have the funds to hire a graphic designer? Where do you go? What do you do?

Video #4: Congruency

When it comes to creating a funnel that generates traffic and converts it into sales, it comes down to congruency. This is an overlooked concept and you need to understand how to apply it in your funnel. So, in this video, we'll cover each step of the funnel and what you need to do, step by step.

Video #5: Visual Real Estate Matters

No, we're not talking about houses here, but virtual real estate. In short, the size of your image matters a lot. You're going to discover the secret image type and shape that converts the best.

Video #6: An Attractive Pin

Once you understand the best converting shape in Video #5, you're going to learn how to apply that to real life. You're going to learn what tools you need to create a very attractive pin that will turn ugly and boring content into eye-catching pin worthy content.

Video #7: The Anatomy

As we're talking about images, I'm sure you're asking: "Ok, what exactly am I supposed to put inside the graphic?" "Is there a blueprint or a formula?" Yes, there is and that's what we're going to cover in this video.

Video #8: Reverse Engineering Hack

Now that you understand the formula, how do you go about getting ideas on what images to use? In this video, we'll reveal a hack that you can use to find trending pins in your niche and reverse engineer it to find your competitor's secret sauce.

Video #9 - Pin Automation

Congrats, you've completed the course! This is sort of a bonus video that will make your pinning easier. Pinning lots of high quality images is crucial and you want to schedule their release as much as possible. But how do you do that when you're sleeping or on a vacation? We'll discuss some tools that's worked well for us that will automate this tedious and time-consuming process.

Grab this video course and learn how to generate high converting traffic from Pinterest !!!

Product Launch Ignition Video Course

9 videos - Total length 74 minutes

Announcing The Brand New, 9 Part, Step By Step Video Course That Shows You ...

"Discover How to Launch Your Product ...Without Your Server Crashing, Losing Lots of Time And Money Along The Way...Finally, You Get to Learn Directly From a Product Developer That Has Launched Many Successful Products Since 2005...Starting Today!"

You Get Access to Step by Step Videos That Show How to Do It The Right Way Using Real Experience, Not Theory

You may have a great product, but if you launch it wrong, you're leaving money on the table.

I see everyday, product launches happening. Some do enormously well and some don't make a couple dollars.

You could spend months or even years to get a product developed, but if the product launch planning is done incorrectly, you won't get the results you want. You see....my goal here is to get you to launch a good product, so you can help people, and in the end you will make the profits you want.

Remember...Help people get what they want, and they'll help you get what you want.

Now keep in mind that this is not a get rich quick system either, and it takes hard work. There I said it. But just with any business, if you have the right plan to go by, then your chances of doing well is greater.

The biggest mistakes I see people make is launching a product without doing the proper testing and planning. Not only have I seen it, I've experienced it myself. Yes, I have several launches that were pure failures, but I learned from them, so I'm glad I failed.

Ultimately failure in the end is success if you learn from it. With that said, you don't have to make the same mistakes I made by watching this video series.

Introducing...
Product Launch Ignition
9 Part Video Course

Condition: You must have a product and have at least a month ahead of your launch before you use this video product. If you don't have a product, but still want to plan ahead, go right ahead. But I want to let you know in advance and be honest that you'll be receiving information about Product Launches.

Here's a list of this 9 part video series in more detail

Video #1 : Introduction to Product Launching

In this video, we introduce you to product launches and an overview of this video series. See...understanding what you will be learning and how this system comes together will help you speed things up.

Video #2 : Planning Your Launch

This video covers a first step and an important step to product launches. Without the proper planning, your launch will fail. When I say "fail", I mean it won't reach it's full potential in impact, whether that may be how many people you are able to help and at the end of the day, profits. So in this video, you'll learn what it takes to plan a launch correctly, every step of the way.

Video #3 : Server and Web Hosting Precautions

Imagine this. You launch your product. You're all excited...and then CRASH! Your site goes down and customers that want to buy can't. You email them later and they no longer want to buy...so you end up losing out on a lot. These are true stories.

The fact of it all, is that yes it happens to just about anyone, it's happened to me, it's happened to many others, and it can happen to you. But with the proper knowledge you can prevent it from happening. In this video you will learn how.

Video #4 : Finding and Contacting Affiliates

Want to make your product launch bigger? Then you'll need to find affiliates to promote it if you haven't already. Now contacting just about anyone isn't going to do the job. You must contact people who would actually be interested in promoting your product. But how? How do you go about doing this if you don't have a huge list to promote to? You'll learn more in this video...

Video #5 : Affiliate Promo Tools to Create Momentum

In Video #4, you learned how to find and contact affiliates. But if you don't have the proper promotion tools for your affiliates to use, then they may not promote your product. You see, most of your affiliates are on busy schedules, so it's your job as the product developer to make it super easy for your affiliates to promote. In other words, do 100% of the work, so your affiliates can hop onto your product launch quickly and easily. More on that in this video.

Video #6 : Contest or No Contest? Prizes

Should you have a contest? Should you give prizes for winners of your contests? Can contests really boost your over profits? Those questions and more will be answered in this video.

Video #7 : Prelaunch To Build Curiosity

I've seen product launches without a prelaunch and ones with prelaunches. And the ones with prelaunches have always done very well, assuming all the proper planning has been done ahead of time. This is because if people know that you are about to launch and they have been waiting, they'll be ready to buy. It's all about curiosity. Without the proper prelaunch, you're again leaving money on the table. More on that in this video.

Video #8 : The Big Launch Day - Snowball Effect

It's the big launch day. You're ready to launch. You're excited. Is that it? Nope. There's a method called the snowball effect which you need to use while it's happening. And without using it, you could be leaving \$1000's on the table. More on that in this video.

Video #9 : Follow Up

After launch day, you need to follow up with both your JVs, affiliates, and prospects. But what do you do? This method I've seen pull in \$1000's more, but you have to do it right. Do it wrong, and you'll lose time and money. More on that in this video.

So...with that said, grab this video series now and learn how increase your profits by launching your product the right way!

SEO Split Testing written material & videos

10 videos - Total length 52 minutes

Are You Ready To Achieve Data Driven Success?
It's About Time For You To Learn SEO Split Testing!

SEO (Search Engine Optimization) is never a completely sure thing. If a company claims that it can guarantee to get you to the top spot in the SERPs (Search Engine Results Pages) for any given keyword, you should run a mile: they're blowing smoke.

While this is true however, what is also true is that some methods are more successful than others. And some are more of a 'sure thing' than others.

And in that regard, the SEO strategy that is perhaps the closest thing there is to a guaranteed route to success... is split testing.

Split testing essentially means taking a rigorous and somewhat scientific approach to your search engine optimization, which effectively means removing the guess work from the process. In fact, what split testing really amounts to, is helping your site to 'evolve' to become the most optimized version of itself.

How does all this work? It's actually very simple, although not without a great deal of nuance that can determine the success of such endeavors. When done well, split testing can mold any website or blog into a hugely successful titan that catapults every new post to the top of Google. When done incorrectly, split testing can jeopardize all your hard work and risk getting your site removed entirely.

It's high-risk, high-reward; but it's also perfectly accepted by Google and a skill that's 100% worth developing.

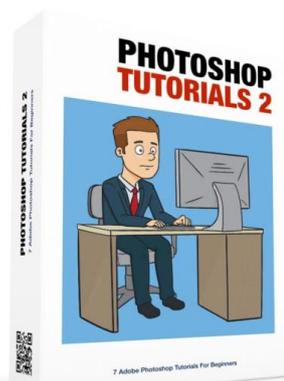

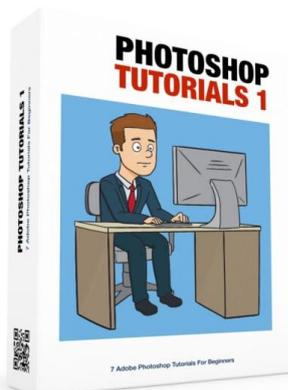

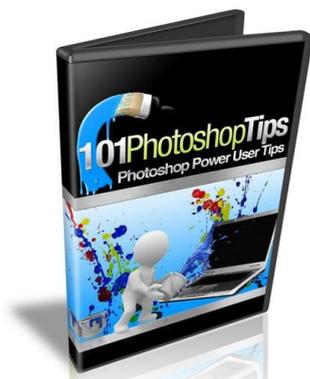

We're going to take a deep dive looking at the power of split testing for SEO. You'll discover how to use this strategy employing the most effective tools, how to avoid common mistakes, and how to use split testing in a host of other capacities too: such as to help sell a product, or improve engagement with your audience.

Once you master this skill, you'll be able to take your SEO activities to another level.

- * You're going to take a deep dive looking at the power of split testing for SEO.

Want to start your own thriving online business?

Of course you do! With so much benefits such as being able to work when, where and how you want, having an online business is the ideal dream business.

The question a lot of people ask is: Why start an online business? The answer is as varied as there are online businesses to start!

The three most popular reasons are:

- * Independence – you can be your own boss and set your own hours
- * Flexibility – you can build your business around your lifestyle instead of the other way around.
- * Profitability – you put the proceeds of your hard work in your own pocket instead of someone else's.

The problem is, with all the information, gurus, and courses out there, where do you even begin?

Oftentimes, the prospect of starting a new business can be daunting; however, as you'll discover over the coming days, starting a new online business is not difficult when you know how.

I've written a step-by-step guide on how you can start an online business, even if you're a complete beginner. And these will include video version.

It's called: Internet Marketing For Complete Beginners.

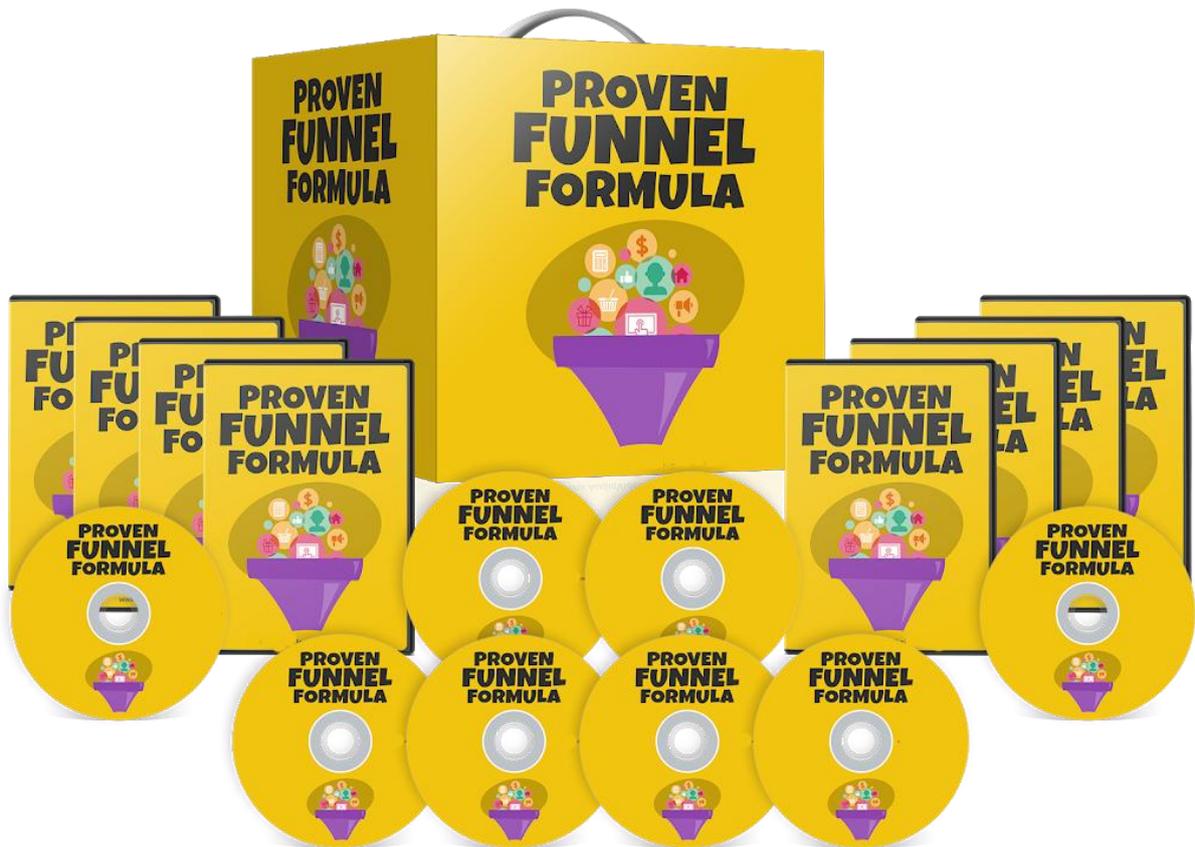

Here are some benefits you'll get from getting this course:

- How to choose a niche to target. What is a niche and why does it matter?
- How to choose a business name.

- How to get web hosting for your website.
- The power of email marketing and why you should start building an email list.
- How to get your emails to stand out and get engagement.
- How to get traffic through paid advertising such as Facebook Ads, Google Ads.
- A keyword tool you can use to find out how many people are searching for a search term. If you know what people are searching for, you'll gain more traffic to your website!
- How to integrate social media to grow your business.
- The social media platforms to consider going on.
- How to grow your connections on social media channels.
- Four ways you can monetize your business.
- Growth hacks and advanced strategies to skyrocket your business.
- How to use "influencer marketing" to get a flood of new traffic to your brand and business.
- And so much more!

Make sure you claim your copy right now while it's hot!

Proven Funnel Formula Video Course

Announcing a Brand New 9-Part Video Course

"Finally, Discover How to Generate Micro-Targeted Leads That Are Ready To Buy Your Products & Services, Starting Today!"

These methods are based on a working system. There's no theory here!
Imagine if you could get micro-targeted leads ready to buy from you!

If you've ever wondered what the easiest way to convert your prospects into sales is, then here's the secret.

Give people what they want.

While I know that sounds too simple and like "duh", common sense, the reality is that implementing this is actually harder than it sounds.

This is simply because most of your customers don't know what they want. Some do, but most don't.

Bear with me for just a second.

How much easier would it be to get leads and sales if people TOLD YOU what they most desired?

Then all you'd have to do is simply point them in the right direction and they'd buy.

You don't have to spend hours trying to beg them to buy either.

How much easier would it be and how much faster could your business grow?

Here's how to do it...

Through segmentation, or in other words creating very specific email lists that cater to a very specific need and demographic.

You're essentially helping the person move closer and closer to the next steps... your products & services.

... and you can achieve this goal through surveys.

9 Part Video Course

Here's a breakdown of this 9 part video series in more detail.

Video #1 - Introduction and Getting Started

To make sure that you get started right, we will start discussing how you can get into the right mindset of getting quality leads. You will also be given a quick overview of what's inside this video course, so you know exactly what to expect and that way you can implement this at a faster rate.

Video #2 - Why Surveys Are So Powerful

When it comes to getting the right data to sell your products and services, there is a special art that many salespeople use. There is a time to be proactive and sell – and there are times when we need to do the opposite. We'll discuss why this is important and how it makes surveys even more powerful. We'll also discuss different types of surveys being used and the one we will be focusing on for this funnel.

Video #3 - Your End Goal

In this video, we will examine your end goal or objective. How your funnel will look like depends on this piece of the puzzle. Many people make the mistake of not analyzing this and jump straight in. Your end goal is a huge deciding factor as to how your layout will be set up, so this is crucial.

Video #4 - Your Product & Service

What are you selling? That is the big question. In order to fully understand who will buy your products and services and why they would, you need to fully understand the inner workings.

So, in this video, we will break it apart, so you have a better picture of how to create your survey funnel.

Video #5 - The Buyer That Fits

Based on the previous video, we'll take what you learned and build upon that. We'll begin to analyze the buyer of your product & service in much more depth. This is important because if you don't know "who" will buy it and their exact demographics, it's going to be very hard to relate to them and get them to trust you.

Video #6 - The Typical Day

In this video, we'll take a look at the typical day of your buyers. Understanding their day, their frustrations, their pain points, what makes them happy and more is crucial. This is the data we need to put on the survey form.

Video #7 - The Survey Form

By now you will have almost all of the data that you need to start brainstorming how your survey form will look. You'll get a better view of what questions to ask, how long your form will look, and much more.

Video #8 - The Mindmap

In this video, we will be discussing a strategy that you can use to make even more money as a super affiliate marketer. As many of you know, affiliate marketing is a very short-term type business structure. That means you need to move on from product to product to product. But how can you use one product that is doing really well for you and take it to a whole new level and make a ton more money with it? This is a specific strategy that we use personally ourselves and make a lot of money doing it. Also, we'll discuss more about it in this particular video.

Video #9 - Implementation to Segmentation

At this point, it's time to implement so that you can properly segment your buyers to speak to them individually. In this video, you'll learn what form app to use so that you can implement your survey successfully! You'll also learn how to integrate it into your email autoresponder system so that you can properly segment your email lists and start making the sales you so desire.

Grab this video course and learn how to generate high-quality leads.

P.S. Have you tried other sales funnel blueprints and had no success? Unless you take drastic action right now, nothing is going to change. Don't wait any longer!

Email Profits Academy

Do you have an email campaign that is dialed in and converting for you?

No?

Don't worry, most people don't have an email campaign like that. Most entrepreneurs don't have time to build a funnel like that because they aren't focused on building an automated funnel that can be huge for their business.

Here's the thing. Once you have the foundation for an automated funnel setup you can spend your time focusing on traffic and conversions.

That means you can FINALLY have a campaign that's dialed in and converting.

Do you want the system for doing this?

Get access to the Email Profits Academy now and start building your automated email funnel.

Who this guide is for: • Anyone looking to make money online • Anyone looking to sell their own products online through automated funnels • Authority figures, coaches, and experts that want to make their life easier with an automated funnel. • And a lot more! If you're someone that wants to sell digital products online and you want to spend your time focusing on traffic and conversions then this is for you! Once you have this system setup you're ready to spend most your time on traffic and conversions and this is where the real money is made online.

The amazing thing about this system is that anyone can do it. It doesn't matter if you're a beginner, non technical, or anything else. While this system can sound complex it can be

set up in most any autoresponder such as Aweber and GetResponse. So if you're ready let's dive in. What we will cover in this guide:

- The components of a truly automated email funnel
- Why an automated funnel is so important to your business and success online.
- Content emails and why they are so important to keeping your subscribers engaged and opening.
- How to get started implementing this guide right away.

An automated email funnel is a great way to simplify your business and make sales of your products without all the heavy lifting.

However most to ever implement a system like this in their business. Usually...

- They don't know where to get started
- Setting up all the technical pieces seems to difficult.
- Or they are not sure what a full email system like this looks like.

What if it didn't have to be so difficult? What if there was a system that was easy to follow so that you could set this up in your business.

I have great news!

Here I'm going to be sharing with you one of the key components of building a successful automated funnel.

You won't believe what all you get inside. This program will give you everything you need to set up a powerful automated email funnel.

Here's just some of what you will get inside:

- The exact products and email sequences you need to setup your email funnel to earn day in and day out.
- What to put in your automated email funnel to keep your subscribers engaged and opening every email you send. This is huge!
- The two key things you need to focus on to be successful with online marketing. No one talks about this and might be the most important thing you need to learn to take your business to the next level.
- How to strategically optimize your entire campaign. This is how you take your funnels to the next level.
- How to segment your list properly so you can send your best promotions to your hottest leads while nurturing people that aren't ready to buy from you yet.

Are you ready to take your business to the next level? If so start implementing this today!

Learn How to Meditate

Stress and tension are among the most inevitable physical and mind states that almost all people experience on a regular basis. That is because all people are subject to too much thinking and worries about a lot of things, including studies, work and so much more.

Experts and researchers assert that people suffer from many diseases because there is so much stress. Of course, stress is not the main cause of flu, cancer and other ailments, but several studies show that stress is a contributing factor. When people are stressed, they are susceptible to physical exhaustion, making their immune system weak.

Thus, effective measures to control and relieve stress and tension are very important. There are many products and instructional materials available at various media portals and venues, but nothing could really come close to the information the book 'Meditation: The Guide to Self Enlightenment' could provide.

'Meditation: The Guide to Self Enlightenment' is a self-help instructional book download that would surely impart to readers effective and reliable ways on how to start mediation. Meditation has been found as an effective technique to combat stress.

Many people try to meditate on their own, but often, the efforts are futile. That is because without the basic knowledge, it would be impossible for a person to attain the state of mind that is needed for total relaxation. Meditation sure leads people to that ideal mind state.

There are many other factors that could help in attaining the benefits of meditation. Sleep and attitude are cited as among those factors, so it would be helpful if you would know of ways and strategies to use them.

'Meditation: The Guide to Self Enlightenment' is written in a way that you could easily comprehend. There is no need to consult the dictionary when reading it. The book is not boring, unlike others, and is full of wit, so you would not feel bored reading it.

FOR IMMEDIATE RELEASE:

A colleague introduced you to meditation. You noticed that she is more calm, reserved and relaxed since she got hooked. You want to be like that too.

Six billion people on earth. Only a percentage of that figure really takes time to unwind and relax. You're one. You're conscious of the activities you engage in and you know that it pays to take a break once in awhile.

Think of it as those one-on-one with your guidance counselor which you were required to do once a year through out grade school, middle school and high school. Being analyzed by a stranger is excruciating but at least with meditation, you are the one analyzing yourself.

Next thing you know you're craving to know more and the only way you can satisfy your thirst for knowledge is to read as much as you can about the subject matter.

We recommend that you check out "Meditation: The Guide to Self Enlightenment". With this book, everything you need to know about fitness and staying healthy is coined in layman's terms for easier understanding.

People who have tried their hand and head out on the fundamentals of fitness and health admit that it does not come simple the first few times they try it. Sure there are books and instruction guides out there for them to check out and seek advice and more assistance from, but too much knowledge can result to differences and dichotomies of one guide from the next, confusing the reader more.

This isn't your typical book that you can get a copy of at your nearest book store or at your local library or the Internet. In fact this book is so detailed that it has been referred to as the "Meditation Manual."

When you have possession of this book, you will be able to learn the right way of meditating. You wouldn't need a trainer because you yourself know the rate you're going.

Clearing Your Mind and Improving Your Life. No stones are left unturned when you get your hands on this now. You will become a complete expert on this, and you'll get everything you

need inside to do the same. Placed Upon Us That It Can Feel Like There Is Nowhere To Turn That When We Feel Like We Just A Little Bit Of Breathing Room And A Chance To Relax.

Fortunately, there is a solution. No matter how many demands you have placed upon you during the day, Meditation is an option that you can easily make the time for.

Even just setting aside five minutes for yourself can make the difference between a frazzled, miserable mess at dinner time and a balanced, calm person who is ready to take the next step, no matter where it leads!

This amazing program will guide you step-by-step on how to incorporate the right nutrients and essential vitamins into your daily food intake.

When we reach the age of 40 and above, our bodies are prone to suffer from terminal illnesses like heart attack, diabetes and obesity...

Centers for Disease Control And Prevention state that heart disease is the leading cause of death for both men and women.

Every year about 735, 000 Americans have a heart attack and more than half of the deaths due to heart disease in 2009 were in men.

About 610,000 people die of heart disease annually! – that's 1 in every 4 deaths!

And that's only from the United States! Imagine how terrifying the numbers are when you take into account the entire world!

Unless you want to add to the number (which I'm sure you don't!) now's the time to take things into matter and start eating healthy!

Do it for yourself and your loved ones before it's too late.

Think of how they would feel to lose you. And the pain...

Don't put them through all that heartache when you can be with them every step of the way.

You have the power to change your life for the better.

Eating Healthy will bring a huge difference to your health and life.

It all starts here.

Did you know that you have the power to prolong your life? (That's right, like a superhuman!)

Sounds too good to be true?

It's not... When you make healthy eating a lifestyle, you slow down your body clock + combat chronic diseases.

A healthy body = longer lifespan.

Here's how Eating Healthy can transform you into a superhuman:

- Everything starts with your mind and it will be conditioned into making healthy eating a lifestyle instead of a duty
- You will be highly motivated and determined to change your life for the better
- Combat age-related chronic diseases and add precious years into your life
- You will wake up with the confidence to take on anything life throws at you

And you can achieve all that with only a rock bottom price!

Why wait another day when you can get an instant access to:

All juicy information on how to achieve your optimal health and live a longer life!

Seriously, don't take my word for it... you simply have to check it out yourself!

Be a guardian angel for your family

Are you family-oriented? Do you love your family more than anything else in this world?

If your answer is yes, I'm sure you will want to be there for them through thick and thin.

And here's how you can do that.

Isn't it wonderful to be able to see your kids getting married, your grandkids calling you for the first time or you bringing them out for some family time?

Now imagine what would happen if you neglect your health...

You could potentially suffer from a terminal illness and die before you had the chance to do any of that...

That's a pretty grim future to look forward to...

I can show you the escape route from this bleak path once and for all.

But you need to take the first step.

Eating Healthy will show you where to begin but it is ultimately your own effort that will change your future.

Start making healthier food choices in your everyday diet.

The Ultimate Canva Graphic Design Course - Video Course

The Ultimate Canva Graphic Design Course - Video Course

Did you know that 50% of small businesses choose to do their own graphic design, or hire in-house? I don't know the stats, but I bet the number of internet marketers who choose to do some or all of their graphics editing is MUCH higher than 50%!

Graphics creation tools sales are astronomical! There are a lot of us and we are all looking for solutions and many of us are on a shoestring budget...

But, one thing you don't see much of are tutorials on how TO use some of the tools that are available. I know MANY marketers, and most of them would rather use free software and create their own graphics than buy Photoshop and hire a designer to do it.

Solo Ads Formula Video Training

Solo Ads Formula Video Training
9 videos - Total length 80 minutes

It's not about the size, it's how you use the list. I've seen lists of 10k convert at 1% or less, while lists of 500 at 20-30% outrank them. It all boils down to these three rules and many more factors.

Follow it and you'll get there. Don't follow it or don't know it exists, then say goodbye to your list growth and conversions.

- How would you like to know if the solo ad list owner is good or not?
- What questions should you ask them?
- How to email your list so they'll actually buy?

All these questions and many more will be answered in this specific video series.

Announcing The Brand New, 9 Part, Step By Step Video Course That Shows You...

Finally, Discover How to Build a Profitable High Converting List from Solo Ads...The Right Way - Starting today!

In this step-by-step video course you will get to watch over my shoulder as I show you how to create a proper plan of attack to build your list, build a relationship with your list properly, and convert your lists into sales when you promote something.

Dear Solo Ad List Builder,

List building is only profitable if you focus on building a quality list.

The big myth that people want you to believe is that you need a larger list, or that you should build the list fast. The concept of quantity over quality.

But I want you to think the opposite here - quality over quantity. Get the thoughts out of your head that tell you that you can only succeed with a big list. Forget all the video courses that you've watched that tell you that you can or should build a 10,000 list in 2 days. Because with that mindset, you'll lose the focus which is serving those on your list and seeing them as a cash machine versus human beings.

Quality over quantity!

A list of 100 could trump a list of 20,000 in terms of how it's used, and I've done it over and over again.

How would you like to learn how to not only – Build a list from solo ads but also how to get that list to convert?

There are three factors here:

1. Where you get the list
2. Your initial offer
3. How you use the list

Most people that fail either look at one or two, not three.

In order for this to work – you need all three main factors, which I'll cover in more depth.

But for now, let me give you some insight that you can use now.

Converting a list is what takes time but is where the magic happens.

So, if you set yourself up for success and create a proper plan of attack – which I'll show you in this specific video series, you'll be closer to success.

Let's take a deeper look at these three factors in action.

Yes - You can build a profitable list from solo ads.

But not all lists are created equal. In other words – not all lists will produce quality results.

Let's look deeper into these three factors

1) Where you get the list

Here are some common mistakes people make:

- Finding a list owner who's emailed their list so many times that it has diluted their list. The list is sick of emails of little value – that when you make an offer – you are positioned with the reputation as “bad” just by association. If you don't know how to look for a list owner who has not diluted their lists, then you have already set yourself up for failure.
- Finding a list that is outdated. It's good to know how old the leads are and how interested they have been in the solo ads that have been sent out.

Or on the customer's end...

- Finding a list that is not related to the topic of their initial offer.
- Not creating a plan of attack

2) Your initial offer

Obviously in order to get more people to sign up on your list when you do a solo ad campaign, you need to make sure that your initial offer is something of value.

In other words, you want to make sure that it is something that people really, really want.

You may not realize this, but your initial offer is what will position you from here on out and brand your reputation as “quality” or “bad”. It will brand you as someone either to be trusted or to be avoided. Of course, there are many other strategies along the way that I will teach you in this specific video course to help you stand out as “good quality”.

3) How you use it

It's not about the size, it's how you use the list.

I've seen lists of 10k convert at 1% or less, while lists of 500 at 20-30% outrank them.

It all boils down to these three rules and many more factors.

Follow it and you'll get there.

Don't follow it or don't know it exists, then say goodbye to your list growth and conversions.

- How would you like to know if the solo ad list owner is good or not?
- What questions should you ask them?
- How to email your list so they'll actually buy?

All these questions and many more will be answered in this specific video series.

Video #1) Introduction

In this specific video, you will be given a quick overview of the video series as a whole, how it all works, and tools you will need. This way you will be able to understand how all the pieces of the puzzle fit together. In other words, once you understand this then implementing the process will actually be easier and faster.

Video #2) What Is your end sales plan?

One of the reasons why people fail is they get all excited about solo ads, building their list, and creating wealth before actually implementing a plan of attack. I know this can be exciting for you, but in order for me to help you – I need to show you how to create this plan of attack and apply it to your initial offer and future promotions as well.

Video #3) Create your Mind Map of Success

After you have brainstormed the basics and your initial plan of attack. It's time to iron this out, and create a mind map of success to ensure that you're able to follow through on every step of your plan.

Video #4) Where should you get the list?

Remember that where you get the list from is key. So, in this specific video you're going to learn what questions to ask solo ad list sellers. Before you jump all in because you're excited, it's very important to do your due diligence and research of the solo ad list sellers before you pay money or even worse get bad leads.

Video #5) Big Myths Gurus want you to believe

There are many big myths that the gurus want you to believe. They sell a dream that shows you that you were able to build this massive list that converts into many sales. While that dream can come true, it does take some work in reality to create a high converting list. One of the myths is that you're able to build a massive list and start promoting to that list immediately. If you don't have a relationship with your list, then converting them into sales is actually a lot harder. Now the approach that we will be taking in this specific video is quality over quantity. This way it doesn't matter if you have a list of 100 people, 200 people, or even 300 people.

Video #6) Congruency and Initial Offer

Congruency is key, and using this specific concept and applying it to your plan of attack will allow you to convert at a higher rate. We will be covering everything from signing up, to training, and tips all the way to what you should sell.

Congruency in application to your initial offer is important as well. If your initial offer is not valuable to your customers' perspective – then that will reflect on your reputation and your positioning. So, we'll talk about positioning and how to do it correctly and more on that later.

Video #7) Your Personality

Another key to positioning yourself is your personality. As you build a relationship with your list - you will attract people on your list who are a lot like you. And you will likely turn off those who are not like you. Without knowing it - birds of a feather flock together – that saying is true and still holds true to the application of this specific process.

Video #8) Follow Up series

Within your plan of the attack you should have a follow-up series. A follow-up series is merely a way to communicate with your new list and warm them up on a consistent basis. Now, there are many ways of approaching this specific strategy. And you'll learn more in this specific video on how to properly implement the follow-up series in the proper manner of building a strong relationship with your list.

Video #9) How to Convert

Now, here's the moment that everybody has been waiting for. How to convert your list so that when you can sell your own or an affiliate offer, you actually make sales. By following the whole process that I will be laying out in this specific video series and creating that plan of attack, in order to convert - you have to make sure that everything lines up correctly.

You want to position yourself in the manner of somebody that they can really really trust. In this specific video you will learn how to properly convert and increase your conversion rates at a phenomenal rate.

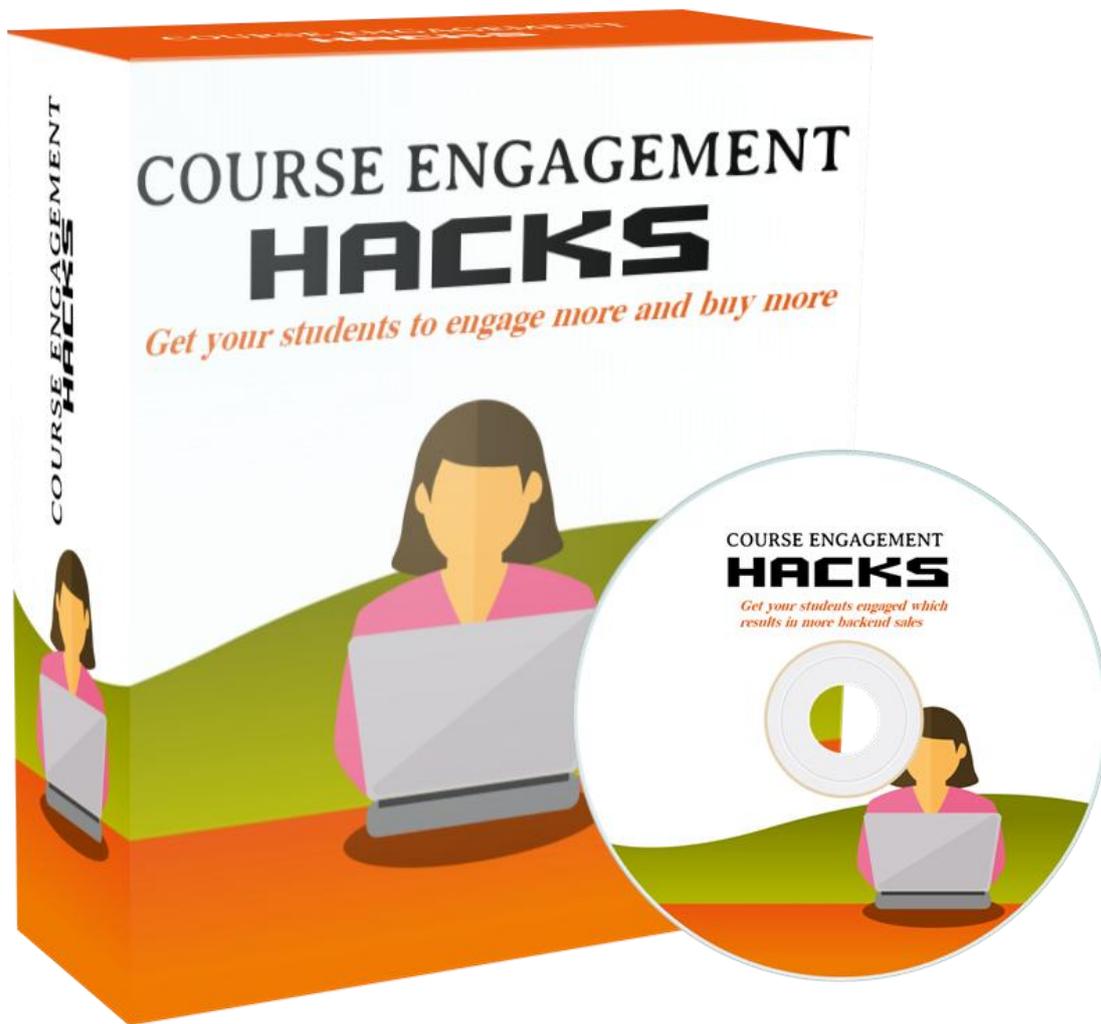

This is no get rich quick scheme. It's about building a quality list over quantity and building a relationship with your list for years to come. Remember, the key is the more you serve them, the more they will respond to you in the future.

Grab this video course, and learn how to build your list from solo ads effectively in your business, increase your sales conversions, relationships, and more!

Course Engagement Hacks Video Training

8 videos - Total length 46 minutes

Announcing The Brand New, 8 Part, Step By Step Video Course That Shows You...

“Finally, Discover How Boosting Course Completion Rates & Engagement Can Double Your Backend Sales!”

In this step-by-step video course, you will get to watch over my shoulder as I show you things that can get your course students more engaged and motivated to take action.

Dear Online Course Entrepreneurs,

Have you ever wondered why you're not getting as many sales to your online courses?

Maybe you're getting a few to bite your initial course, but you can't get them to buy all of your other classes.

Have you ever thought about what might be the cause of all of this?

The truth of the matter is it comes down to low consumption rates and low engagement. Here's what I mean by this.

Did you know, on average, that only 10% or fewer people complete an online course?

Think about that statistic for just a second. Perhaps even put yourselves in your students' shoes by asking yourself how many online courses you have completed as well.

It's highly likely that most of you have answered either you hardly ever complete an online course, or if you have, then you are the small minority.

There has to be a reason why people only watched 10% of the course. Even though you have an excellent course, people's attention spans are short, and they can get sidetracked easily.

The truth is that if they don't complete your online course, then they will get buyer's remorse in the end and won't feel motivated to buy your other classes. That said, if, however they complete the online course, then they will at least if the course is good mini will feel that they got the right amount of value from you.

More consumption equals more trust.

More trust equals more sales to your other courses.

So how do you go about getting your students to complete your course? How do you motivate and get them excited to continue? How do you get their attention even if they get distracted?

How do you tap into the inner human mind or subconscious of your student to get them to continue?

Introducing ...

Video #1: Introduction

In this video, we will give you a quick overview of what's inside this with you, of course. You'll also be given a quick checklist on precisely what you need to have before you get started.

Video #2: The Human Brain

You might be wondering why we are talking about the human brain in a course about how to increase her student consumption rate. Believe it or not, this is a significant and massive part of getting to understand how to get your students to consume more.

Video #3: Desire Trigger

In the next few videos, we will cover different triggers that you can activate to get your students excited and motivated to continue. The first trigger is what we call the desired trigger, and just as it says, do you want to trigger people's inner desires. But what kind of questions should you ask? Or what exactly does that look like?

Video #4: Progress Trigger

Another motivational factor that can help boost your dopamine triggers is by showing your students where they are in the course as a whole. But again, what exactly does that look like in practical terms? With software or word press plug-in, should you use to implement this sophisticated system?

Video #5: The Human Trigger

Another way to get people motivated is through accountability.

Human interaction is essential. However, it goes deeper than just that. We'll talk about what that looks like and, in practical terms, how you can implement that in your business. What kind of software or word press plug-in so you can use to achieve this sophisticated system.

Video #6: Course Rewards

As we discussed in the previous video, rewards are a significant motivating factor. We all, as human beings, desire to earn rewards because it is chemically embedded into our brains. But what does that look like in an online course setting? How do you implement that in your online course? More importantly, what software or word press plug-in's should you use to achieve this?

Video #7: Engagement Rewards

It's one thing to earn rewards based on topics, lessons, or courses completed. However, you want to make sure that people engage with your online course as well. Most of the time, within online communities, it's the sound of crickets. Silence. It's a known statistic that only one out of 100 people speak up. So how do you go about rewarding people for maybe commenting more? Engaging more? What does that look like in practical terms? And more importantly, what software or word press plug-in should you use?

Video #8: Attention Trigger

Last but not least, in this particular video, we will discuss how to grab your student's attention. For example, let's say they forget about your course, and you need to send in some shape or form get them back.

Remember, your goal is to help your students ultimately, and to help them, you need to get them to go through your course if you genuinely believe in it. What does that look like, and how can you implement this in your own business?

Grab this video course and learn how to increase your online course engagement!

P.S. In this step-by-step video course, you will get to watch over my shoulder as I show you how to increase your online course consumption and engagement!

Create High Converting Webinars Video Course

9 videos - Total length 67 minutes

Announcing the Brand New, 9-Part, Step-by-Step Video Course

Finally Discover How to Build High Converting Sales Webinars From Start to Finish... Starting today!

In this video series you will learn how to set up a webinar from start to finish using a step-by-step blueprint. We will cover all the processes that you need to complete to achieve this and create compelling webinars that will bring you sales when done correctly.

Have you noticed that a lot of businesses and nonprofits have started using webinars to generate leads?

It is known that Webinars have a better conversion rate than most sales communication mediums simply because of the live social element and social proof.

Questions that could be potential objections can be answered in real time.

Average conversions can range from 10 to 35 percent or even higher.

Of course automated webinars convert really well, too.

But numbers aside, webinars can do much more than just sell products and services. In fact, webinars can be used to build great relationships with customers and prospects...

... Which often times is most overlooked.

Most people make the mistake of thinking about making the sale first instead of gaining trust and providing value.

Now, of course webinars can be used in many different ways depending on your ultimate business goals.

Some webinars are purely educational, and some webinars are ultimately aimed at getting people through your business door.

So often times, not all webinars are created equal.

Now the type of webinar that we will be aiming for is sales webinars, which are used to sell your product or get more leads.

But the ultimate goal is to convince your customers to engage and interact with you, which equals higher sales conversions.

So the big question is, how do you create high converting webinars that have high engagement that will yield higher sales conversions?

Video #1: Introduction to Webinars and Recommended Tools In this specific video we will be covering a quick overview of this video series, itself. You will learn how it all works as well as the recommended tools and webinar platforms that we have tested. You can learn from our mistakes so that you don't have to make them.

Video #2: What's a Webinar Without An Audience? So what's the point of having a webinar without knowing your audience? That is the big question. Often times we make the mistake of jumping straight in to creating a webinar and not realizing who the target audience is we are trying to engage. We may know what the audience wants on a general level, but do we really? So we will be covering who your best prospects are and how to engage them, so that you can attract the people most likely to buy.

Think about it. Why would you want to spend all your time creating a webinar and drive tons of visitors to your webinar, only to realize that your webinar does not convert because it is not speaking to the correct audience? So we will also be covering how to figure out the audience's desires and objections so that you can craft the perfect angle that sells every time.

Video #3: Our Blueprint for a Sales Webinar Now that you've got the basics, it's time to show you our exact step-by-step blueprint to creating a high converting sales webinar. You will get to see an exact mind map of our recommended sales webinar. Of course, this is just a basis for you so that you can customize it and create your own.

Video #4: Finding Your Angle

So what is your sales webinar angle? The angle is how you are going to ultimately sell your product or service in your sales webinar. There are many different types of angles that you can use to your advantage and we will be covering these in this specific video.

Video #5: Who's the Host? It's very important to convince people of why they should listen to you. Often times, they probably already know if they have signed up for your webinar, so this is a time not to brag but to gain and reinforce their trust. There are certain ways of doing this correctly, and there are wrong ways of doing it, as well. This section is especially important, because failing here could turn people off. Alternatively, success will lead to a better conversion rate.

Video #6: The Meat In this part of the sales webinar blueprints, we will be covering how you can convey the content or meaty part of your webinar. There is more to this section than just simply blurting out why your product/service is worth buying. So we will be showing you specific strategies that you can use to really get people interested in your product or service or business.

Video #7: The Pitch Now it's time to pitch or sell your product. This is one of the biggest areas that people fall short on. A lot of people do not like to sell their product or ask for the sale. But we want to be upfront here and say that you can do it in such a way that people will really want to know about whatever it is that you are selling. But of course, everything before this part must be done correctly.

Video #8: Justifying The Price If you have an expensive, high-ticket product, and you're worried that people are not going to buy it simply because it costs more than a couple hundred dollars, then I'm going to show you a specific strategy that will help you justify the price. While price is often one of the major objections that prospects will have, no doubt this strategy will convince them they want your product even more.

Video #9: The Close After you have justified the price, it's time to close the webinar. But you don't want to just exit right away. In fact, there are a couple things that you might want to do beforehand. So we will be covering specific strategies that work really well to persuade especially hesitant people or those who are on the fence to buy your product or service.

In this video series, I'm going to show you how to properly set up and use the power of smart video sales letters.

According to the Online Publishers Association and Adweek, online video has become a powerhouse to boost sales. These statistics illustrate just how influential video can be:

"From the people that have viewed sales videos promoting a product or service, over half will take some sort of action after viewing a video...including 12% who will actually buy the product being offered. To put this into perspective, typically only .5% to 2% of visitors to a "textonly" web site will end up purchasing a product."

With markets across the board moving more towards video, video sales letters have become extremely useful in helping companies increase their bottom lines.

During the last 10 years, however, more and more people have seen video sales letters, driving the need for constant evolution and change.

In order to stay ahead of the game and your competition, you need to make sure that you stay up-to-date on the newest technology and utilize it to make your video sales letter stand out.

Thus we would like to introduce you to the hybrid, or smart, video sales letter. This type of strategy will allow you to take different products and services, and use their different technologies to increase your sales conversions across the board.

Video 1 - Introduction to Hybrid Video Sales Letters In this video, you'll learn how to use what we call a "hybrid video sales letter" to sell your products and services. You will also learn why we do not recommend using the standard video or text-only sales letter, and how we use a new strategy to increase sales conversions.

Video 2 - Who is Your Audience? Big mistake that many people make when creating sales letters is jumping into writing them before understanding their target audience. In this video, I will show you what tools you can use to figure out who your audience really is. If you know who you're writing to, it will make the process of crafting your sales pitch much easier than trying to sell to a general audience. This means you'll connect better with each potential customer, and your conversion rate will be much higher.

Video #3 - What is Your Audience's Pain? Part of writing an effecting sales letter is figuring out your audience's pain: what problems do they face, and how does your product or service

solve that problem? By digging deep into that pain, you will be able to directly sell to your audience and make them believe that they need what you're offering. By applying the brainstorming strategy detailed in this video, you will be able to quickly create an effective salesletter when we begin actually piecing things together.

Video #4 - Common Buyer Objections and Resistance Besides understanding your audience's pain, you need to figure out the main reason why many of them do not buy. Completing this step will allow you to list these reasons in your sales letter and speak directly to the customer considering them. In this video, we will cover some of the most common reasons for objection and resistance so that you can safely apply them later on

Video #5 - Video Sales Letter Formula There are two parts to the hybrid video sales letter. The first part is, of course, to write out the sales letter. The second part is applying technology to what has been written, and then inserting other types of technology into the sales letter itself. In Videos 5, 6, and 7, we will be covering this formula. By the end, you should be able to write your video sales letter quickly because most of the work will already have been done in the previous videos.

Video #6 - "What's in it for me? Why should I believe you?" These are two very common questions that people are going to ask as they watch your video sales letter. Your prospects ultimately want to know why they should purchase from you. Thus, you will need to show them the exact reasons why your product or service is beneficial to them. In other words, what is the end result for them? What will they gain? In addition, they will also want to know why they should believe you in relation to your credentials— something you can back up with social proof. We'll cover exactly how to do that in this video.

Video #7 - Your Pitch At this point in the video sales letter, it's time to make your offer, give your pitch, and get your audience to take action. So in this video, we will be covering six different points that are crucial to closing the sale and getting people to ultimately either buy your product or service, or take whatever action you're trying to get them to take.

Video #8 - Technology: Video Conversions Bump In order to complete the hybrid video sales letter, it's critical that you finish the series with Videos 8 and 9. These videos will show you how to apply technology to the written sales letter, and where in your sales letter you should include certain items to increase your conversion rate. As times have changed, technology has changed as well.

Video #9 - Text vs. Screen Capture Another way to increase your conversions in application to the hybrid video sales letter is by figuring out when you should use screen capture video. Text-only video sales letters do not cut it nowadays when selling certain types of products. That and more will be covered in this video to ensure that you are ahead of the game, as well as your competition that's stuck using the old style video sales letter. Interested in how to create your own high converting video sales letter? Everything you need to know is right here in this video course!

P.S. Learn how to use smart or hybrid video sales letters to convert a large majority of your prospects.

P.P.S. This training course was designed to help you create a long-term conversion strategy.

The Power Of Self-Discipline PDF & VIDEOS

9 videos - Total length 53 minutes

My friend Kevin is one of the smartest people I know, hands down. Nobody even comes close.

I went to a pretty good, highly ranked university in California. In my close circle of friends, Kevin outshone everybody else. It's as if he can figure out complicated math equations at the back of his head.

In fact, one time, we were talking about the Heisenberg Uncertainty Principle while eating pizza. There I was, completely stumped about this theory, and my friend Kevin broke it down in between bites of a slice pizza. That's how brilliant he was and still is.

Kevin was so sharp that he only needed to show up in class once, and that is to take roll so that the professor doesn't drop him on the first day, and he'd refuse to go to the class ever again. When exam time rolls around, you can count on Kevin to get at least an A. He did this like clockwork.

In fact, in many cases, he got awards and honors and he didn't even have to show up for the lectures.

I remember laughing when he asked me for any notes that I had for a class he completely ditched. I was laughing because I thought that he was just wasting his time. How can this guy ever pass, much less get an A, when he didn't even bother to show up?

Boy, was I surprised when the guy got better grades than I did. And he didn't cheat. That's how talented Kevin was and still is.

But Kevin, just like most people, has a weakness. We all have our own peculiar and particular shortcoming. It comes with the territory. Kevin is no exception.

His problem was self-discipline. He had a Ferrari engine, but he did not want to drive it in a disciplined, methodical and systematic way.

Now, he is twice divorced, living in an apartment whose rent he could barely afford, and constantly drinking his problems away.

When I think about the life of my friend Kevin, I not only focus on the missed opportunities for career advancement and accomplishments that he is otherwise capable of achieving, I also think about the rest of us. I think about how we missed out because he did not get his act together to fully unlock his potential so the rest of society could benefit from his genius.

Kevin could have been the next dotcom billionaire. He could have been the next Web 2.0 genius that revolutionized technology. But there he is, in the San Francisco Bay Area, struggling to get by on what essentially is a minimum wage.

What's going on? How can somebody with so much potential end up with so little?

It turns out that self-discipline is not a neat little trait that we can choose to have. It is THE trait for ultimate success. Without self-discipline, everything else falls apart.

You may not be the sharpest tool in the shed, and that's okay. As long as you are self-disciplined enough to figure out what you need to learn so you can achieve a little bit more tomorrow, eventually, you'll get there.

Self-discipline is crucial because there are so many distractions trying to divert our attention from what's important and what is truly worthy.

You have to understand that life is full of rewards. But the problem is, the biggest rewards that life has to offer are only attained through a long, sustained period of focused effort.

Discipline is crucial for everything in our lives.

This book gives you a practical framework on how to practice and develop self-discipline so you can become more successful in all areas of your life. It helps you develop a new mindset so you no longer have to continue to struggle.

Eventually, you will reach a point that things seem to magically fall into place. It's not because there is actual magic involved, but because you are so disciplined that opportunities come to you and things start to flow.

You can achieve this state, but the price is high and the journey is long. Are you willing to take that journey?

The Power of Social Media Stories (Text & Videos)

10 videos - Total length 48 minutes

There is a saying among marketers that “storytelling is SEO for the human brain.” Of course, when this saying was first coined, it had nothing to do with social media stories.

But perhaps it should have done. Social media stories in fact have HUGE potential to engage audiences, to build authority and trust, and to generally boost your brand. Not only that, but they’re also gaining in popularity all the time. Social media stories took the internet by storm and they’re not showing any signs of slowing down now.

In this book, you will learn precisely what a story is, how to create them, and how to have huge success using them to grow your audience and increase brand loyalty. Four out of five major brands report using stories to promote themselves, and that should tell you something about how big this is going to be going forward.

If you're sick and tired of trying methods that don't work if you're struggling to get visitors let alone targeted customers buy your product or service. Then good news, this is going to be the last course on Traffic you'll ever need. How would you like to, for a change, transform your dead 'ghost town' sites and them to life?

Because with what I am about to show you - if wielded with no restrictions - can send your server into meltdown. That would be a problem - but a good problem for a change. But seriously, would you like to be able to wield such a potent weapon? Because finally, you get to get droves of visitors beating to the doors of your e-commerce stores.

Waving their credit cards frantically as they line up to buy from you... And for the first time, all the products you've been buying up until now make sense. This is the missing puzzle.

Product Description

This ultimate go-to Master course took several months to create, and at my expense. But it was totally worth it. This 60-part full video course will show you ways to generate highly targeted website traffic using free and paid methods and build a strong following of loyal subscribers - with minimal effort.

Unlike most courses out there that focus on just 1 or 2 methods... This Giant Training Course Covers 11!

It's too long to mention but to give you an idea, you will discover things like:

How to tap into Facebook via FREE and PAID traffic.

The ONLY way to ace it with solo ads.

Sneaky little way to build your subscriber list through forums (without spamming!).

How to leverage off 'warm traffic' and get people to send YOU traffic (I call this OPT - Other People's Traffic).

I also show you how to convert all your social media accounts into a beacon to attract targeted visitors.

There's more covered... that's just scratching the surface.

Living Paleo & Living Paleo Upgrade Package

It seems that everywhere we look these days, someone is trying to convince us that their way to get healthy is the best way. Between fad diet trends, supplements, and products that claim to work miracles, the world can seem like an amazing place full of wondrous technology that can help us to shed weight fast. And choosing between options is often overwhelming and difficult. Especially once you begin to unearth the gritty truth about many of these options. Scams abound, chemicals and hormones can be altered in the body and cause terrible effects, and products that claim to work miracles can be harmful in the long run. So who is there to trust when we want to begin a healthy lifestyle? The answer is simple. Nature. In nature, there is a natural balance that can be very delicate. If we veer away from natural practices and substitute things like healthy eating and exercise with pills and starvation, the obvious results will be detrimental to us. We were designed to enjoy a bountiful diet that is rich in specific things; healthy fats, vitamins, and minerals. That is where the paleo diet comes into play. Introduced during the 1970s by a man named Walter Voegtlin, the idea of eating only the foods that were consumed by our ancestors from the

Paleolithic era has become immensely popular. When we stop ingesting foods that were introduced during the time hunting and gathering slowed down into farming, the idea is that we limit many starchy products and fatty meats and stick to the foods that are nutrient rich and ideal to keep the body and gastrointestinal tract as happy as possible. He thought it would be a good way to influence modern people to eat in a healthier fashion. Voegtlin was a pioneer in his field, and his research inspired others to reach conclusions about the diet for themselves. Another doctor believed that our bodies were evolved for this type of diet. That is, to be eating the kinds of foods that our hunter gatherer ancestors were able to gain access to in their travels. We are naturally adept at digesting lean meats, fruits, vegetables, and nuts and seeds. In fact, they are incredibly good for us! The types of foods that became commonly and commercially available to us through farming, foods like grains, corn (which is technically a grain), and dairy products consumed in an abundance can cause the body many issues. Lactose-intolerance, gluten intolerance, and other allergies abound from commercialized and common staples foods of this nature. Not to mention, several of them are very starchy, which can make it difficult to lose weight. The Paleo diet is great for those who are hoping to shed a few pounds, but more than that it is a major lifestyle choice. It isn't just about losing weight, but about feeling great and making choices that are healthy for you and that make you feel good. It can be very stressful to know that the foods we are eating, by choice, are doing harm to our bodies. Even if we aren't consciously aware of that specific harm, we innately understand what is good for us and what is bad for us most of the time, and there will always be a weight on our shoulders when we are consuming foods that we know for sure are bad for us. While losing weight isn't the primary goal of the Paleo diet, it is an incredible benefit. If you are used to the Standard American Diet, also known as the SAD diet around the world because of the pitiful lack of nutrients in the typical meals served when consuming processed, pre-packaged meals, then chances are high that you are suffering physically from it in some way, or will in the future. Processed foods are terribly unhealthy, as will be covered in a later chapter. So cutting these bad foods out and making the choice to go Paleo is a huge game changer. Your body and your mind will feel better than they have in years! All because of a simple switch. Going Paleo isn't a fad diet trend where you are going to have to go out and get a journal to count every calorie you consume so you know whether or not you are doing it right (Although to be truthful there is some benefit to some journaling, if you want to hold yourself accountable to the choices you are making. More on this in a later chapter.) Sure, if you are overeating and not getting enough exercise to burn the calories you consume, then calorie counting can be of great assistance. However, many people can take that practice to extremes and not consider the nutrients they may be missing out on when they are following fad diets. Going paleo is completely different. You don't have to get out a big complicated map to chart the way. You just have to take a step back and look at our ancestors and think, well, they were able to achieve good physical health a natural way. So can we!

If going Paleo sounds like the right choice for you, then look no further. This guide will help you to get started on this rewarding journey to eating foods that were meant to be eaten, the way they were meant to be eaten. No more of that SAD nonsense! So let's get started!

Images are one of the best way to engage and communicate people and according to brain specialist, images can easily be record into our brain compared to other media. Because of this, web designers, presenters often use in image to represent something. The thing though, if you are not a photographer or graphic designer, you most likely find those images online that some have licenses that you don't have the capability of using it. But there are also some images that are free to use and this is called stock images. Inside this product, you are about to get a bundle of HD images which you can use on your own project or to your clients.

A Step-By-Step Video Guide On Mindfulness and Meditation So You Can Stress Less And Live a Simpler, More Fulfilling Life. Stressed? Anxious? Over-Worked? Meditation is the Perfect Cure for 21st Century Malaise

Maybe part of the reason that meditation is making such a drastic comeback, is that there has never been a time that we've needed it more.

Most of us are worked to the point of exhaustion: burned out and dried up.

Meditation is the perfect cure for that: it helps us to find calm in the storm and to see perspective when we're caught up in petty concerns.

Isn't it time your life got a little calmer? A little simpler? Within days, meditation can help you to feel more like your old self – more on top of things, and less stressed.

SELF CONFIDENCE SECRETS PDF & Video Training

10 videos - Total length 53 minutes

Product Description

Are You Ready To Win More In Life Today? It's About Time For You To Learn Self-Confidence! There's a big difference between self-confidence and self-esteem. Self-confidence is your attitude and your belief in your ability to get things done. Real self-esteem must be based on competence.

If you foster self-esteem in students, self-confidence will naturally follow. When people are more confident, they tend to excel better in life. This has been the accepted gospel in education policy for going on fifty years now. When people have a high opinion of themselves, confidence should naturally flow, right? Not quite.

How to Win More in Life. No stones are left unturned when you get your hands on this now. You will become a complete expert on this, and you'll get everything you need inside to do the same. It turns out that "hollow" self-esteem only tends to produce impostor syndrome and, worse yet, an entitlement mentality.

Whatever achievements people get with this mindset will be quite spotty. They tend to do things right from time to time but not all the time. There is no consistent threshold of success and excellence.

It turns out that the real solution to consistent victory still involves self-confidence; however, this self-confidence must come from the right place.

Finally, Discover How to Get Better Search Engine Rankings By Making Your WordPress Website More SEO Friendly... Starting Today!

This has been working for the last decade. There's no theory here!

Whether you are trying to rank for a specific term in Google or other search engines, most businesses forget one crucial thing, which is on-page search engine optimization.

That technical term simply means that you help the search engines know what your site is all about.

The reality is that most businesses forget this crucial piece of the puzzle and simply don't know why they're not getting traffic from Google.

They think SEO is a big scam purely because of bad assumptions.

So, the big question is: how do you achieve this?

How do you appear on the right keywords that your prospects and potential customers are searching for?

Google and other search engines have become much smarter than ever. What this means is that they are constantly trying to figure out what your website is all about.

That said – it still needs a little help to know what your website is all about and that is the best way to get ranked on the right keywords, so that you attract the right prospects.

Most people forgo on-page search engine optimization, and try to focus on getting backlinks.

This is a big mistake, because by not doing something as simple as on-page SEO, you will lose out on some great initial rankings.

Who is this PLR Video Course Perfect For?

Internet Marketing Coaches

Book Marketers

Affiliate Marketers

Digital Product Resellers

Email Marketers

Membership Site Owners

Marketers looking for Editable Video Guides and Tutorials with Private Label Rights

Newbie marketers looking to learn from it

Online businesses looking to grow

Serious Marketers

And many other ways!

The fact is that people love learning from videos and video training in highly in-demand because people prefer learning from videos.

Here's a list of this 9 part video series in more detail.

Video #1 – Introduction to On-Page SEO

If you've ever wondered what could be holding you back from implementing basic on-page search engine optimization, it's often because of your mindset. So, in this video we're going to talk about how to get into the right mindset. You're also going to get a quick overview of what's inside of the video course so you know exactly what to expect. Plus, you'll be given a list of things you'll need to get started.

Video #2 – The Main Focus

On-page SEO is such a broad term that covers a lot of areas of your website, both on the front end and the back end. There are so many different approaches and angles to take that it's quite easy to get

confused and we don't want that. Therefore, the purpose of this video is to get you focused and help you understand what the plan is.

Video #3 – 5 Important Factors

Before we jump into the 5 major factors that all your WordPress sites (or even non-WordPress sites) should have, it's important to have a general bird's-eye view of what they are.

Video #4 – URL Structure

This is something that has changed slightly in the last decade, but not drastically. The question that everyone asks these days is what domain name should you use? Should it be a brand name or should it be a keyword-rich domain? There's more on that in this video.

Video #5 – Body Text Structure

Should you make your blog post and page human friendly or search engine friendly? If both, how do you achieve that? What are search engines looking for? What are the things that you should avoid doing? What elements should you always have on your post or pages?

Video #6 – Image Optimization

When it comes to images, how does the search engine know what the images are all about? Are they smart enough to figure this out? Or do you need to add some special code to achieve this?

Video #7 – Title Optimization

This is extremely important because it's often the first thing people will see as they are searching the internet – before they even get to your site. This needs to be set for all of your posts and pages. But how do you properly set the title of your post or page?

Video #8 – Meta Optimization

Just like the title optimization video beforehand, this is also what people will see as they search the internet. It's the description beneath the title

and you'll also need to set this up on both your posts and pages. How do you properly set the meta-data and how long should it be?

Video #9 – Top 2 WordPress Plugins

Now that you understand how to implement these 5 factors, I'm going to show you how to automate them. There are two WordPress plugins that we highly recommend you install, which both have free and premium paid levels. Do you really need the paid levels, and how can they help you rank your sites even better?

Grab this video course and start making your WordPress site SEO friendly. Follow this simple step-by-step system and start setting up your very own digital membership site!

This Private Label Rights Video Course comes with an entire business in a box reseller package that you can use, rebrand and resell at your wish.
